Community Spirit

A feeling of advancement in community sociability has been awakened with our neighboring town of Cereal by the action of the Chinook and District Agricultural Society, in setting the date for their Burns' Night Concert so as not to conflict with a dance being held at Cereal.

The Advance has been asked to convey the thanks of the O. L. of Cereal to the Chinook cultural Society for co-operating in setting the date for their concert on Jan. 30 instead of Jan. 23rd, as the earlier date had been selected for their dance at Cereal.

We have been informed that the Women's Institute of Cereal has also shown the same spirit by holding their social evening and dance on Feb. 6th instead of Jan. 30, which was the date first selected.

Let us all pull together, forget any little differences that may have been thought to exist, and work for the advancement of this section of the province with a cheerful spirit.

Correcting Some Misleading Pool Statements

Since the pool meeting on Jan. 10th it has been brought to my attention that Mr. McPherson stated that Mr. McFarland had not refused to work under the directors of the pool, a contradiction of a statement made by me. A few facts should permit you to draw the proper conclusion.

Mr. McPherson admitted that owing to financial difficulties they had to accept one of a limited number of men to act as general manager of the pool, no control over his policy to be held by the pool. This is the only meaning to be derived from the familiar phrase that he be given a free hand. His discrediting the marketing plan of the pool, which policy was based upon the principles on which the pool was organized, should be conclusive proof that he has refused to act under the pool officials.

At the same time this statement was made by Mr. McPherson, he stated that Mr. McFarland did not wish to be called a dictator or liquidator. Nevertheless, he is both, in as much as he is the acting representative of the powers behind his appointment.

Our director stated plainly at Chinook and Youngstown, while the same information was dragged from him by questions at Cereal, that the financial interests forced a general manager upon them and they were forced to accept him and the policy laid down. Hence he is a dictator or the agent of the dictators.

On being questioned at Cereal, Mr. McPherson's statements were to the effect that the pool was not in a position to "fire" McFarland until the pool affairs were in a position satisfactory to the financial interests, and this could not be until the loans from the banks were reduced. Mr. McFarland was placed there to market the pool wheat to achieve this result. Therefore Mr. McFarland is both a liquidator and a dictator, even if he does not want to be called the same.

I want to say that at the three meetings which I attended many statements like the above were made. It appears to me that there were too many evasive statements and answers to questions. The more information I received the more I was convinced that a change in the management is greatly needed, if not an absolute necessity.

N. F. Marcy.

Cons. School Board Meeting

The Board of Trustees of the Chinook Consolidated S. D. No. 16 met in the school on Tuesday afternoon, Jan. 13, at 1 o'clock, all the members being present.

Lloyd Robinson was appointed chairman of the board.

Then followed the reading of the minutes of the last meeting of the board, of the correspondence and of bills presented for payment.

The minutes were adopted as read.

The following bills were ordered paid:

Dep. Prov. secretary, license for hall, \$1.00; W. W. Isbister on acct., \$8.50; L. L. Dawson auditing 1930 books, \$10.00; C. W. Rideout stamps, \$8.00; Lorne Proudfoot excise stamps, \$2.00; Royal Bank debenture payment, \$1117.50.

McLean-That a delegate be sent to the Teachers' Convention at Edmonton Feb. 4, 5 and 6. For Rosenau, McLean; against, McDonald, Robinson.

Robinson-That janitor be instructed to procure some chloride of lime and disinfect the toilets, and try to keep them in as sanitary a condition as possible.

McDonald-That we make a general reduction of 20% in amounts paid for van driving, salaries of secretary-treasurer, janitor, in fact in everything except teachers' salaries. For, McDonald; against, Robinson, McLean, Rosenau, Hill.

McDonald-That Lorne Proudfoot be re-engaged as secretary-treasurer for the year 1931 at \$300, the same salary as last year. Hill-That we call for tenders for the position of janitor for the year 1931. For, Hill; against, McDonald, McLean, Rosenau and Robertson.

Rosenau-That W. E. Brownell be re-engaged as janitor for 1931 at \$85 per month, the same salary as last year.

Hill-That L. S. Dawson be assessor for 1931 at a salary of \$25, the same as last year.

Hill-That the following be the estimates for the year:

Expenditures:	
Teacher's salaries	\$ 5800 00
Officials' salaries	335 00
Debentures pay. 1931	1117 00
Van driving	6500 00
Grounds and Buildings	400 00
Supplies, equipment	500 00
Fuel	500 00
Caretaking	1020 00
Other expenditures	1000 00
Total	17172 50

Receipts:	
Government grant	3500 00
Rent of school	300 00
Tuition fees	300 00
Taxes	13000 00
Total	17100 00

McDonald-That the tax rate for the year be 27 mills on the dollar, same as last year.

Rosenau-That a 5% discount be allowed on all current taxes paid before the 15th day of June.

McLean-That L. S. Dawson be auditor for the year 1931, salary \$10.

McLean-That in order to deal with any matter of an emergent nature in connection with van driving, the following committee be appointed: Routes 1, 2, Geo. McDonald; 3 and 4, Aug. Rosenau; 5 and 6, Neil McLean; 7, H. O. Hill.

McLean, McDonald-That the Royal Bank, Cereal, be authorized to accept the signatures of Lloyd Robinson as chairman and Lorne Proudfoot as secretary-treasurer of the school district and that a resolution in the same form as that

Good Buys For The Week

CHINOOK MEAT MARKET

Heathdale Happenings

N. D. Morrison and E. B. Allen, delegates to the U.F.A. convention from Coltholme local, left for Calgary Tuesday morning.

Mr. Harris of Oyen was the speaker at the meeting held in Cloverleaf school last Wednesday evening, the subject being "Naturalization of credits."

E. B. Allen returned home from Edmonton Saturday morning.

There was a large attendance of both men and ladies at the U.F.A. and What-Pool meeting held Saturday afternoon at Coltholme school. The next meeting will be on January 31st at Cloverleaf school.

Mr. and Mrs. Norman Stewart and Grace, also Mr. and Mrs. Harrington and family were entertained at the W. Anderson home last Tuesday afternoon.

Mr. and Mrs. Patton, E. Hagey and A. Hagey visited Wednesday evening at the G. Trogan home.

Mr. and Mrs. Falconer and family were Sunday guests at O. D. Harrington's, the occasion being Hazel Harrington's eighth birthday.

A community card party and dance will be held at Cloverleaf school Friday evening, Jan. 23.

Mr. and Mrs. Patton and E. Hagey were visitors at J. Whately's Thursday afternoon of last week.

Mr. and Mrs. Harrington and family and Miss A. Neff were Sunday guests at the home of Mr. and Mrs. J. Paetz of the Cando district.

A large number from this district attended the Cando U.F.A.

card party and dance last Friday and report a very good time. Trump whist was played, honors being won by ladies, first, Mrs. Pat Monroe, second Miss A. Neff, consolation Mrs. G. Trogan; gents 1st G. Trogan, 2nd Frank Smith, consolation Charles Parsons.

Peyton Pickings

Mrs. W. Shier entertained last Thursday afternoon and evening Mr. and Mrs. N. D. Stewart and family, Mr. and Mrs. J. Turple and family and Miss Ida Marcy.

Mr. and Mrs. F. Hobson and family, Mrs. W. Neal and Mr. and Mrs. Ole Rudy dined at the home of Mr. and Mrs. S. W. Warren on Sunday.

The annual meeting of the Peyton school trustees and ratepayers was held at Peyton school on Friday afternoon.

The play acted by Flaxlanders in Chinook last Friday was thoroughly enjoyed by those who attended from Peyton district.

The annual meeting of the Myrtle school ratepayers and trustees was held in Myrtle school on Saturday, Jan. 17.

Kincaid

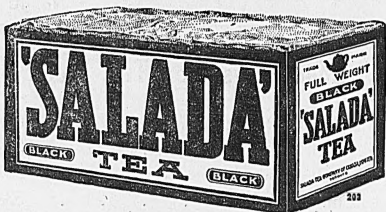

Mr. and Mrs. Ed. Donaldson, of Atlee, spent Sunday with the latter's parents, Mr. and Mrs. Paul Seeger.

Mr. and Mrs. Franz Youngren and family spent Saturday evening with Mr. and Mrs. P. Seeger. Three tables were played at 50c.

Clarence and Lemar Seeger spent Saturday evening at the Seeger home.

A number of young people went to Cabin Lake Sunday to skate. A good time was reported by all.

Keep Cool.

Foreign Minister Briand, of France, when recently taken to task by one of the Nationalist leaders who charged him with lack of firmness in dealing with the existing situation, answered with some show of spirit: "I believe the best service one can render his country just now is by remaining cool."

Another state executive, Marcus Aurelius, gave practically the same counsel in the second century of this era when he said: "Do not be whirled about, but in every movement have respect to justice, and on the occasion of every impression maintain the faculty of understanding." Or, more briefly, keep cool.

The advice to keep cool, says a United States publication, is sound advice to every one of us at the beginning of 1931. True, but it is good advice at all times. The advice will be just as sound at the end of 1931 as at the beginning, and at all time intervening. The two quotations above demonstrate this, inasmuch as the advice tendered by an outstanding statesman of the second century is repeated by one of our leading world statesmen in the twentieth century. The words used may be different, but the meaning is the same.

Do not be whirled about. Keep cool.

When the stream of life is flowing evenly toward its destined port or goal, following a well marked channel, with hardly a ripple on the surface, it is comparatively easy to keep cool. There is nothing to whirl us about, and in the resultant tide of prosperity we pride ourselves on our strength and boast of the stability and greatness of our country.

But it is, when, feeling thus safe from a sense of false security, whether in our individual or national life, we reach the rapids, and rocks of disaster loom up ahead, that we are inclined to be whirled about. Then is the time for cool heads, stout hearts and steady hands. It is then that our strength will be proven, and the stability and greatness of our people and our country established.

In the realm of nature, cyclones and tornadoes result from the impact of hot air currents with cooler currents, the one rising, the other descending. Conflict ensues. So in the realm of world economics, business depressions follow inevitably upon periods of abounding prosperity. Just as heated air becomes inflated, so does man in his business enterprise become puffed up. Both ultimately must be deflated, and it is in the process of deflation that trouble comes.

Then is the time to keep cool. When the sun is shining, and storm clouds are absent from the sky, and the barometer is steady, a ship's captain has a comparatively easy time, but when the storm breaks and the hurricane roars, and the ship is tossed and whirled about, it is essential that the captain remain cool and not whirled about.

"It's old world is just now in a 'storm centre.' It is passing through it; in time it will emerge. But it is now that we must all keep cool; it is now that it would be fatal to be whirled about. The present is not the time to abandon the old charts which have guided us in the past. Now is not the time to throw the compass overboard, and mutiny against the captain. When we have finally emerged from the present difficulty we should, of course, take stock of our harrowing experience, and endeavor to devise ways and means to prevent or lessen the force of another such storm. But while the storm rages, keep cool.

Keep busy; work harder than ever before and work cheerfully, knowing that thereby the present task will be made the easier to bear; keep the faculty of understanding in full play; take alert advantage of every opportunity. Don't be stampeded and don't be discouraged. Let every one put his shoulder to the wheel and all push together.

To one and all, now and for every day of this year, is presented the admonition of the ancient Philistine leader: "Be strong, and quit yourselves like men."

Vast Gold Field in Japan

Mining Engineers Discover One Of Unprecedented Wealth

A gold field, which is declared to be of unprecedented extent and wealth, has been discovered in Formosa by mining engineers representing the Tokio Imperial University. Dr. Jisaburo Yokobori, head of the expedition, estimates the amount of gold available to aggregate \$2,000,000. The deposits, he said, extend for approximately 150 miles and are alluvial in nature. "I actually picked up gold dust in river beds, in the mountains, on the plains and even on the streets of small villages," Dr. Yokobori said.

World Wants More Gold

Gold is one commodity in which there appears no threat of a surplus. The world is constantly crying out for more. From Australia comes word that New South Wales has gone the length of bonusing the industry by paying half the actual working costs of prospectors and offering other inducements. It is said there are over 1,000 prospectors out in that state.

Price 50c a box

Sold by all drug and general stores, or mailed direct on receipt of price by The J. Milburn Co., Ltd., Toronto, Ont.

Vegetables From U.S.

Canada Imports Large Quantities Of Potatoes and Onions

During the first nine months of 1930, Canadians ate more potatoes and onions grown in the United States than the people of any other foreign country, according to a commerce department report. Despite the counter-vailing report of 75 cents a hundred-weight imported in May, Canada took 43 per cent of the total export crop of potatoes during that period. The Dominion took about 40 per cent of the total export onion crop. Canada paid less than a million dollars for the early potatoes and less than \$200,000 for the onions.

A pleasant medicine for children is Mother Graves' Worm Expeller, and it is excellent for driving worms from the system.

Canadian Coal

Nova Scotia, New Brunswick, British Columbia and the Yukon produce the bituminous coal; the Saskatchewan mines yield lignite only; Alberta produces bituminous, sub-bituminous, and lignite, and formerly also mined some anthracite.

Was Weak and Run Down Could Scarcely Do Housework

Mrs. Edward A. Allen, Bezzano, Alta., writes:—"I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework, in fact, I would have to lie down in the middle of an hour or so. I saw your Pills in the drug store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Nations Warned Against Russia

Trading With Soviets Provides Funds To Finance Revolution

A special cable from London to the Toronto Globe says:

"The President of the Bureau of the International Entente against the Third Internationale has issued a serious warning to the nations of the world, through the Geneva press, against Russia's five-year plan. His pronouncement says in part:

"Whoever buys goods coming from Russia helps to provide the Russian government with the funds which it needs to maintain its dictatorship and to finance revolution, in the purchasing country, as in others, takes advantage of the exploitation of the Russian people, and aggravates the shortage of food and other articles of prime necessity from which these people are suffering.

"Whoever sells to the Soviet government, directly or indirectly, receives in payment money of doubtful origin; contributes to the realization of the 'five-year plan,' a war machine of which the workers will be the first victims, directed against the prosperity of other nations."

Overwork or Worry

Taxes the Health Of Thousands Of Young Girls

In the "teen-age" years when school or office work is exacting and outside activities use up so much energy, many girls undermine their health and spoil their happiness for years to come.

At such a time Dr. Williams' Pink Pills will be found most valuable. They purify and enrich the blood, build up the nerve cells and correct run-down conditions. Concerning them Miss Margaret Torrey, Indian, Toronto, Ont., says: "When I was attending high school I suffered from complete breakdowns. My heart would palpitate at the least exertion; I could not sleep and nothing I ate agreed with me. I began taking Dr. Williams' Pink Pills and before long I gained in weight and every distressing symptom left me."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Noise Has Been "Harnessed"

Acoustic Paint Assures Quietness In Toronto's New Bank Building

Once again science has mastered an otherwise physical impossibility. Since men commenced to erect their first buildings they have been confronted with the seemingly unsolved problem of control of acoustics. Prof. G. R. Anderson, of the University of Toronto department of engineering physics, has shown that noise can be controlled and that bewildering noises and echoes can be eliminated from our buildings.

On the sixth floor of the new Bank of Commerce building, at King and Jordan Streets, Prof. Anderson demonstrated how special construction treatment can prevent any sort of sounds produced becoming chaotic, clamorous noises.

The great bank building will be the quietest office structure in Toronto. Rooms that have been structurally treated will be 30 per cent quieter than the others, and he predicted the efficiency of staffs will be enhanced 15 per cent.

Eradication of disagreeable noises is accomplished largely by the evolution of a new type of acoustic paint.

Miller's Worm Powders not only exterminate intestinal and other worms, but they are a remedy for many other ailments of children. They strengthen the young stomach against biliousness and are tonic in their effects where the child suffers from loss of appetite. In feverish conditions they will be found useful and they will serve to allay pain and grating in the stomach, from which children so often suffer.

Agriculture Needs Help

Ways and means have been devised for helping all the industries except agriculture. Thought should be directed at once to a policy that will bolster up farming. If agriculture can be made even tolerably prosperous all other industries will derive more benefit from the reflected prosperity than they could ever hope to enjoy from a tariff as high as the peace tower on Parliament Hill. —Farmers' Advocate.

What Price Glory

Judging from an incident which occurred recently at the Balfour Technical school, Regina, that city might still be in waters of glory and, in fact, for all one gentleman overseas knows about it. The mailman delivered a science catalogue to the technical school mailed from London, England, advertising scientific equipment. It was addressed simply: Science Master, High School, Regina, North West Territories. "What price glory, Saskatchewan?"

W. N. U. 1873

Five Boys—

Best Evidence.

Mrs. Corcoran, of Leigh, writes—"I suffered with biliousness accompanied by bad headaches for days at a time, and every medicine I tried failed to bring relief. A friend gave me some of your wonderful Carter's Little Liver Pills and the first dose gave me great relief. For three years I have taken them every night as a regular and I find they prevent these bilious and sick headache attacks. I have five little boys and I give them three or four every week. I have great faith in them. Take Carter's Little Liver Pills. All druggists 25c and 75c red pkgs.

New Laws In England

Varied Collection Of New Legal Enactments Are In Force

Whatever New Year resolutions the English citizen may make, he will find himself facing a varied collection of new legal enactments.

The standard rate of income tax goes up another 2½ per cent, on the more substantial incomes, though there is a reduction of the tax on incomes of the lowest categories.

The motorists encounter a sheaf of new requirements under the Road Traffic act, most important from a personal viewpoint being the compulsory insurance against third party risks. The speed limit is abolished for private cars and motorcycles. Hospitals will be entitled to charge up to \$125 for expenses incurred in treating accident victims. Hairdressers' and barbers' shops will close compulsorily on Sundays. Jewish merchants may operate on Sundays if they close on Saturdays. The Irish Free State incidentally is promoting a bill to make barbering a closed profession, to be followed only by legally recognized operators. In the Irish rural districts, it is understood, the frugal housewife frequently performs a rough and ready shingling upon her offspring of both sexes by slapping a pudding basin on their heads and shearing around the edges. Perhaps such offenders will be classed as outlaws.

New English legislation provides for different treatment of mental patients of varying degree. And a melancholy reflection upon the state of trade is the provision by which the government continues to pay health insurance contributions for some 100,000 persons out of work for two and a half years or more.

BREAKS UP GAS IN THE STOMACH

Don't suffer from dangerous gas pressing around your heart, from sourness, acidity, bloating or pain of indigestion. Stop worrying. Whenever you need quick stomach relief, take a little Bismarck Magnesia, in powder or tablet. It breaks up gas, neutralizes acids, keeps the stomach sweet and strong, and indigestion perfect. At all good drug stores.

Furs a Necessity

Market For Furs Has Not Suffered During Hard Times

The success of any business lies in the market demand. It might have been expected that under existing depression fur farming would suffer heavily. For some reason, however, this has not been the case for good furs, even at the late winter sales, brought fair prices. From this it would appear that furs are more or less a necessity, particularly in the northern countries.—Animal Report, Federal Department of Agriculture.

Not Improved With Age

In his early youth Mr. Mickleton had been a pretty child. His friends did not believe this was possible, and even he had forgotten all about it until one day he unearthed a painting of himself as a small boy from among the lumber. This he handed to his wife. "There, Sarah!" said Mrs. Mickleton, proudly exhibiting the picture to the servant. "That is a portrait of your master, painted when he was a child." Sarah gazed open-mouthed at the production. "Oh, mum," she said, after some moments, "what a pity it is we have to grow up, ain't it?"

Remove all callouses and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

"Some of the old songs will never die" says a musician. The fact that they are murdered with great frequency seems to make no difference.

Doctor Lives On Raw Food

Advocates Simple Diet In Order To Keep In Good Health

Hard times and unemployment distress could be greatly lessened, according to Dr. Julian P. Thomas, Winnipeg food specialist, because one bushel of wheat and one bushel of vegetation, with a little fresh water, would keep a man well nourished for at least a year.

In support of this startling assertion, Dr. Thomas cites an experiment performed by himself some forty years ago, when he lived on nothing but raw wheat and water for a period of ninety days. At that time the wheat cost \$1 per bushel. When he started the experiment, he had such a weak stomach that he could not eat sufficient ordinary food to keep going. On the raw foods he became so strong and healthy that he was able to turn his excessive energy into money.

Upon investigating the subject, he finds that some people in all of the older nations have lived as he is now living, some of them attaining such old age that modern fables do not believe the accounts, even when they are of the Bible. The fact is, Dr. Thomas was first induced to pay attention to his diet through reading the Book of Daniel. His first experiments were started years ago, and many people then laughed at his ideas. But all of these people are now dead, and he is still going strong, with the firm belief that he will live for one or two hundred years, and that each day of his life will be happy and vigorous.

Asthma Doesn't Wear Off Alone.

Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent incipient condition from becoming chronic and saves hours of awful suffering.

An Accurate Clock

Designed For Timing Football Matches At Highbury, England

A novel clock has been installed on the football grounds at Highbury, England. It is a forty-two minute timepiece, and at half-time and time it sounds an electrically-worked hooter. From one to forty-five minutes are marked on the face in black. From forty-six to ninety they are in red. If a player is injured during the course of a match, the operator can stop the clock at once, for it is worked by ordinary clockwork mechanism. Thus, this clock can be adjusted so as to measure the exact duration of actual play. This mammoth timepiece weighs one and a quarter tons without its frame and is no less than eight feet in diameter. It has been designed for the sole purpose of making the timing of football matches as accurate as possible.

Natural Gas

The consumption of natural gas in Canada during 1929 for domestic purposes was calculated to be sufficient to displace 640,000 tons of coal.

Exports from the United States to the Orient are again increasing.

COUGHS, COLDS
 Dangerous complications can quickly develop. Coughs and colds are neglected. At the first sign of trouble treat your throat with the old reliable
SPOHN'S COMPOUND
 Praised by horse owners everywhere. Used by thousands for over 50 years. On hand at drug stores for the world. See bottle or shipped direct, postage prepaid. Write today! SPOHN MEDICAL CO., Dept. 331 Cooke, Ind.

Prize For Timothy Seed

Robt. Cochrane Of Grand Prairie Awarded C.N.R. Cash Prize

In recognition of having won the world's championship for 1930 in timothy seed, Robert Cochrane, of Grand Prairie, Alta., has been awarded the special Canadian National Railway's cash prize granted at the Chicago International hay and grain show to the Canadian taking first place in that competition.

Announcement has also been made by R. English, of the Canadian National Agricultural Department, that the special prize for top place in alfalfa seed at the same show goes to Nick Chjeltje, of Ranier, Alta., who has been a winner in this field for some years. Cochrane, too, has been champion champion at Chicago for many years, the donors of the prize say, but this is the first time he has taken first place as a grower of timothy seed.

Friday the Thirteenth

There will be two more Fridays the thirteenth in 1931 than in 1930. Friday the thirteenth will fall three times in 1931, whereas in 1930 there was only one Friday the thirteenth. In 1931 there will be Fridays the thirteenth in February, March and November.

Man—"My wife never knows what she wants."

Extension Of Market For Honey In Baking Industry Investigated By National Research Council

Extension of the market for honey in the baking industry would seem to lie in the direction of increasing its use in sweet goods such as sugar cookies, rather than in the manufacture of bread, as has been a common belief, states the report of an investigation in the laboratories of the University of Manitoba, issued by the National Research Council's Associate committee on grain research.

It has been widely held that the substitution of honey for cane sugar in the manufacture of bread would result in a more rapid rate of fermentation and in an improvement in the flavor and keeping-quality of the bread. The study now reported which was made with financial assistance from the National Research Council and the Canadian Wheat Pool by Professor W. F. Geddes and C. A. Winkler, 1900 Wheat Pool research fellow for Manitoba, disproves this suggestion.

The alternative put forward by the investigators is that honey be used where its flavor, higher sweetening power and ability to absorb moisture are particularly advantageous.

It was found that the substitution of honey for commercial cane sugar in various straight-dough bread making formulae made no significant difference in loaf volume, flavor or other bread characteristics, indicating that honey possesses in these circumstances no superiority, but is of equal value when compared on the basis of equivalent sugar content.

Figured On Yearly Basis

Worker's Income Depends On Number Of Working Days

"This city is practically bankrupt." This is a sentence in a letter received from Detroit. It probably means only that Detroit is suffering keenly from the business depression, and that people there are despondent.

It is a little singular that with Mr. Ford paying \$7 a day to his employees—or so the world understands—and so setting a fine example to all employers, that there should not be good times in Detroit. Perhaps Mr. Ford only pays this wage to his men when they are working, and it may be that they don't work steadily.

Seven dollars a day don't mean much to a man if he only gets work occasionally. That would mean \$2,135 a year of 305 working days. But if a man's yearly income only averages \$1,200 a year that would be only \$4 a day.

The problem for wage earners is to get a living wage by the year. It would seem that a bricklayer earning \$10 a day would really only be in receipt of \$5 a day if he only worked six months of the year.

Workingmen have to live whether their jobs hold out or not. All their calculations should be on a yearly basis.

In Times Like These

"What the country needs is men of action, in politics as well as in business," declared Hon. Alfred Durnan, K.C., Minister of Marine, in an address before the Canadian Club at Toronto. "They alone can put a stop to the trade depression which this country and all other countries have suffered in the last couple of years."

New Read Composition

A new composition for highways recently discovered in Cape Town, South Africa, is said to cut the cost of road making one-half as compared with ordinary material, double the life of the road and halve the length of time of laying.

Do you speak French? "Yes, but I don't like it, as I have to think before I speak."—Sondags-nisse-Strix, Stockholm.

Saskatchewan Seed Fair

First Prize For Marquis Wheat Awarded To O. Harrison Of Conquest

Charles O. Harrison of Conquest was awarded first prize for Marquis wheat at the Saskatchewan provincial seed fair held at Saskatoon. Mr. Harrison's sample was outstanding and won easily.

George Canfield, of Wild Rose, near Shellbrook, who was champion in 1921 and 1922, won first place in the open class for other varieties of wheat. He exhibited a sample of Reward wheat weighing 68 pounds to the bushel.

In classes of wheat limited to grain from fields entered in standing grain competitions James Carnegie, of Belbeek won first prize.

In the corresponding classes for new exhibitors, A. Robbins, Laura, was first in Marquis, and G. Mooney, Imperial, in the class for other varieties. All of the prizes in the class for varieties other than Marquis go to exhibitors of Reward wheat.

There is an unusually strong entry in corn in both the sections for the north half and that for the south half of Saskatchewan. In the southern section, F. G. Colquhoun, Maple Creek, was leader in dent corn and F. R. Cheeseman, Forget, in flint corn. For the northern half, H. S. Williams, MacRorie, is first in dent, and W. A. Cahoon, MacRorie, in flint.

Sheaves of grasses and other forage crops judged by T. M. Stevenson, of the field husbandry department, James and Harry Whitehead, of Saskatchewan, figure prominently in the list of winners.

James Whitehead has first place in Timothy and Brome grass, and Henry Whitehead first in alfalfa, red clover and sweet clover. Jack Darnborough, Laura, led in western rye grass; E. Green, Laura, in crested wheat grass, and F. P. Towell, Saltcoats, in alsike clover. The class for sheaves of fodder corn was a large number of entries but various members of the Colquhoun family of Maple Creek take all the four prizes.

Northern Resources

Coal, Oil, Gas and Minerals Found In Peace River Block

Rich new resources of coal, oil, gas and minerals in addition to the vast agriculture and timber lands, have been added to the future wealth of the Peace River block, it has become apparent since the inception of a survey of the area undertaken by the British Columbia government in association with the two transcontinental railway systems. While detailed reports of the surveys under the direction of Major C. R. Crysdale have not yet been presented, indications pointing to important discoveries in the lands recently ceded to the province from federal control have been brought to the attention of the provincial authorities it has been learned.

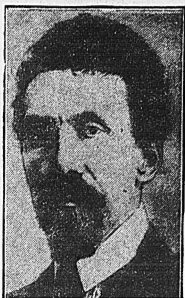

Soph: "What did Paul Revere say at the end of his ride?" Fresh: "Whoa!"

WAS IDOL OF FRANCE

Interesting character study of Marshal Joseph Joffre, hero of the Marne and commander-in-chief of French armies 1915-17, who died in Paris following an illness that necessitated amputation of one leg. The marshal, bearer of British Order of Merit, and Grand Order of Legion of Honor, would have been 80 years old January 4.

RESIGNS POST

Alexis I. Rykoff, chairman of the council of peoples' commissars of the Soviet Union, who has been relieved from his position at his own request. Rykoff, who is to be succeeded by Vicheslav M. Molotoff, has had several conflicts with Josef Stalin, chairman of the central executive committee of the Soviet Union, and the removal of Rykoff will bring more harmony to Soviet Union.

Trade With China

Demand For Canadian Flour and Wheat In Chinese Market. Inquiries for Canadian products have been received by L. M. Cosgrove, Canadian trade commissioner at Shanghai, as a result of the recent visit of the Canadian trade delegation to China. Mr. Cosgrove finds the visit helped to create an atmosphere of goodwill.

Normal trading will likely be resumed during the spring of 1931. Fair transactions have recently taken place in Canadian flour and Canadian wheat. Lumber exports to China have shown an increase and, due to direct steamship service from British Columbia, Canadian lumber now occupies a prominent place in the Chinese market.

Demand Equitable Rates

Will Insist On Proper Ocean Rates and Marine Insurance For Churchill Cargoes

Frank Elison, secretary of the United Farmers of Canada, Saskatchewan section, announces the determination of the executive officers of his organization to support strongly the demand of the Saskatchewan government for the application of proper ocean rates and fair and equitable marine insurance rates on cargoes of grain and other export traffic from Churchill, on the Hudson Bay route, to British and continental ports.

Would Not Need It

A newspaper dated July 26, 1800, just found in Glasgow, Scotland, contains the following item: "Three clergymen after dinner, ate 14 quarts of nuts, and during their sitting drank six bottles of port wine, and no other liquor."

Life Story Of J. B. Tyrrell, Eminent Canadian Geologist, Makes Interesting Reading

Canada's Bacon Trade With Britain Small

Dominion Could Supply Market Now Served By Denmark

Canada supplied only 89,169 hundred weight of bacon to the market in Great Britain of the 7,414,020 hundred weight imported in the first 10 months of 1930, according to trade returns. The value of the imports of bacon were \$34,922,093, of which the value of Canadian bacon was \$435,355.

Importation of Canadian hams by Great Britain is quoted as 70,968 hundred weight of the total imports of \$65,035 for the 10 months.

Commenting on the amount of Canadian bacon and hams placed in the British market, W. Waldron, provincial markets commissioner, said recently: "The marketing of Danish bacon in England is carried on to a great extent by the Danish Bacon Company, Smithfield, London, England. Bacon is received by this organization from 49 factories in Denmark. The company has depots at London, Hull, Leth, Liverpool, Manchester, Chester, Barrow, Newcastle, Stoke-on-Trent, Birmingham, Cardiff, Ipswich, Exeter, Portsmouth and Bristol. Denmark has concentrated on the British market, which could be very well served by Canada, as she is well established in England and her bacon is popular."

Mr. Waldron continued to say that the sales of the Danish Bacon Company in England reached \$35,000,000 each year and that all the Danish bacon imported by England was not handled by the bacon company.

Loss From Insect Pests

Damage To Saskatchewan Crops During 1929 Amounted To Over Ten Million Dollars

The year 1929 is referred to as one comparatively free from spectacular outbreaks of insect pests. But, the annual report of the Dominion Department of Agriculture cites as a conservative estimate of the damage by the major insect pests to the wheat crop in Saskatchewan alone \$10,012,000.

A saving of \$26,000 in one district in Alberta through a local control campaign in connection with the sugar beet crop, and another case of a saving of \$5,900 on one farm alone as the result of control work with the wheat stem sawfly, show rather conclusively the value of the work being carried out under the direction of the Entomological Branch of the Dominion Department of Agriculture.

Financial Expert Gives

Cause Of Depression

Men Unable To Control Machine They Have Created

"Human beings have not learned how to control the machine they have created," declared Sir Basil Blackett, noted British financial expert, when questioned as to the cause of the present world-wide depression on his arrival at Montreal. Sir Basil is a director of the Bank of England, and chairman of the Imperial and International Communications, Limited.

Financial member on the executive council to the Viceroy of India, Sir Basil is well qualified to speak on that country, which, he said, was ready for a greater measure of responsible government. He expressed pleasure in the appointment of Viscount Willingdon, governor-general of Canada, as the next Viceroy.

Powdered Milk

Saskatchewan Government Will Encourage Manufacture Of Product

The Saskatchewan government is fostering plans to encourage the manufacture of powdered milk, as used extensively in the British Isles, by those poultry raisers who provide the British market with milk-fed chickens. The possibilities of such an industry are emphasized by W. Waldron, provincial markets commissioner, who is back from the World's Poultry Congress in London, England, and who points out that part of the manufactured product could be used for prairie-raised birds.

Bee-Keeping Profitable In Alberta

Bees have proven to be a very profitable and practical division of agriculture in Alberta and today represent one of the province's youngest and fastest-growing industries, in the opinion of H. L. Luther, head beekeeper at the Lethbridge Dominion Experimental Station.

Scientists, particularly Canadian scientists, are a very modest lot, and it is often hard to get at the facts of lives to extract the real gold of romance which often underlies their careers.

For this reason a biography of that eminent Canadian geologist, J. B. Tyrrell, written by his life-long friend, W. J. Loudon, B.A., will be welcomed in that it tells a remarkably interesting story with praiseworthy clearness and throws much light on this type of explorer-geologist who has made such a big contribution to the development of Canada.

Mr. Loudon tells of the geologist as a boy in Weston, Ontario, wandering after school hours about the woods collecting specimens of rocks and fossils; developing a taste for the use of the revolver and rifle; going to Upper Canada College, where his scientific bent received recognition, and thence to Toronto University, where he annexed the highest honors in geology, chemistry and allied subjects.

Then we see Tyrrell coming to Ottawa to take a position with the Geological Survey and his explorations for many years in the far West and the far North. That was in the early 'eighties, when Calgary and Edmonton were little villages, when buffalo still roamed the plains and thrills aplenty were the lot of the pioneer. Journey after journey was taken into Hudson Bay, to the foothills of the Rockies, through Saskatchewan and Manitoba, and to the outposts north of latitude fifty.

Particularly important were Tyrrell's surveys in the Red River basin. Coal mining in this area was then a dream of the future, and its subsequent development owes much to the splendid reports turned in by this great geologist. He was the first man on the continent to discover the remains of dinosaurs, those gigantic animals which millions of years ago wandered in the foothills of Alberta. At great personal risk and with his surveying party brought the first specimens of these animals to the National Museum.

Tyrrell was sent to the Yukon just before the great gold rush of '98. The lure of gold got into the blood. He resigned his job with the Geological Survey and with a mining friend went to make his fortune. He nearly starved for a time, then prosperity came his way. Contracts for expert opinion poured in, claims were taken up, companies formed and for some years his income ran to \$30,000 a year.

But the day of placer mining was passing; he failed to get the financial support for his biggest property, he was involved in costly litigation, and by 1905 he decided to bid farewell to the Land of the Midnight Sun. In this part of the story we see Dawson as it really was, a town of wild license, of mad gambling, of hard days when gold was washed in abundance from the river bed followed by wild nights when it flowed into gambling halls, into the clutches of painted women or was squandered on the turn of a card.

Tyrrell came back from the Yukon untainted by the excesses of many who had been lured by the spell of El Dorado, but not much richer in pocket. Later he accepted a very remunerative position as chief geologist for a great Anglo-French mining corporation and continued his explorations and investigations in every part of the Dominion, but particularly in Northern Ontario. A few years before the Great War he made the most important survey of the Hudson Bay district ever undertaken at the request of Sir James Whitney. Still hale and vigorous at 72 he is today recognized as one of the greatest mining and geological experts on the continent.—Ottawa Journal.

The man who tells you he is no fool may be only mistaken.

"Why did you steal this gentleman's watch?"

"Because I thought it was a gold one."—Lustige Kölner Zeitung, Cologne.

Live Stock Improvement

Dr. Ruddle, Dominion Dairy Commissioner, Says Matter Needs Attention

Periodical testing of herds and direct efforts at improvement of stock are the most important questions before the dairy farmers of Canada, said Dr. J. A. Ruddle, Dominion Dairy Commissioner, who addressed the annual convention of the Dairy-men's Association of Eastern Ontario.

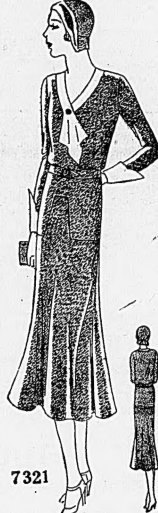

Farmers were feeling the pinch of low prices, but, he said, the average farmer "is losing very nearly if not quite as much every year by his failure to give attention to this matter as he is through the drop in values at the present time."

"The average annual yield of milk per cow in Canada is now thought to be about 4,500 pounds, or the equivalent of just about 400 pounds of cheese. If this yield were increased by 30 per cent., which is easily possible, it would be equal to an increase of two and one-half cents a pound on the original 400 pounds of cheese at 15 cents a pound after allowing for the cost of manufacture," Dr. Ruddle said.

From reports already received, the commissioner estimated butter production in 1930 was probably 10,000,000 pounds higher than in 1929.

IT'S SWAGGER

All Tingey models are created and sketched in Paris and the patterns are made in New York.

Every woman knows she can't have too many frocks of sports character in her daytime wardrobe.

Today's mode is especially suitable for the college miss and the business woman.

It is in rich dark green tweed mixture with white silk pique trim. The cross-over jabot collar is accented by a brown button. The Cossack cuffs are jaunty.

The seaming at the front of the dress, conceals hip breadth.—The skirt favors slight flared flutes.

There are any number of lovely woollen fabrics that will make up charmingly in this model, as wool jersey, crepe marocain and crepe plain and patterned woollens.

Canton crepe and crepe silk in travel prints are also smart. This pattern may be obtained in sizes 18 to 20 and 36 to 42. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

"Pointers on Bread Making"

A booklet containing some new and simplified ideas on bread making. Sent free on request.

Western Canada Flour Mills Co. Limited
Toronto - Winnipeg - Calgary.

WORLD HAPPENINGS BRIEFLY TOLD

An increase of \$5,592,819 (about \$27,117,472) in Britain's adverse trade balance for 1930, as compared with 1929, was revealed in board of trade statistics.

The United States senate immigration committee has received the Rees resolution providing a two-year ban on immigration to a sub-committee for consideration of changes.

Exclusion of Orientals from ownership or control of Crown lands in B.C., is sought in a petition to the provincial government by the White Canada Association of Vancouver.

Inquiries for Canadian products have been received by L. M. Congrove, Canadian trade commissioner to Shanghai, resulting from the Canadian trade delegation's visit.

There should be no fear regarding disposal of the 1930 B.C. canned salmon pack, in the opinion of Major J. A. Motherwell, chief supervisor of fisheries.

Three men were killed and one injured when a Royal Air Force bombing plane crashed into a dyke bank at this village on the border of Nottinghamshire and Lincolnshire, England.

The division of the waters of the St. Mary and Milk Rivers in Alberta for irrigation purposes will again be considered by the International Joint Commission at its regular half-yearly session in Ottawa during April.

Money in circulation in the United States increased \$26,000,000 during 1930. The circulation statement of the treasury showed that on December 31, \$4,890,000,000 was going the rounds.

A contribution of \$50,000 for expenses of participation by the United States in the world's grain exhibition and conference at Regina, Sask., in 1932, was recommended by Secretary of State, Henry L. Stimson, in a report which was forwarded to congress by President Hoover.

A representative of the government will be present at the opening on March 14 of the British Empire Trade Fair at Buenos Aires, but no announcement has yet been made as to the minister whom Premier R. B. Bennett will send to the Argentine capital.

A Word To the Farmer

Must Produce Quality and Control Volume Of Products

In a message to eastern farmers recently issued, the Hon. R. Weir, Federal Minister, points out that to compete in world markets the farmers of Canada must: (1) continue to make progress along the lines of even more scientific farming; (2) reduce the cost of producing farm products; and (3) having a definite purpose in marketing, (a) see that no product inferior in quality goes to a foreign market, (b) produce in sufficient volume to hold a market once obtained, and (c) regulate supply to such markets so as to prevent flooding.

A Nasty Headlight

Some day the captain may turn to the first mate and say: "Hear that headlight?" Sounds funny, but John Rohlfis, marine expert, declares that a new type of headlight with a modified radio beam, combining light and sound, will soon make navigating in fog safe.

Two states have post offices named Snowflake; Virginia and Arizona.

W. N. U. 1873

Impressed With North Country

American Writer Is Surprised At Mining Development In Northern Manitoba

Those coming to The Pas, Flin Flon and Sherridon to see frontier towns where life is in the raw, and "anything goes" would do well to stay away from these centres, W. L. Henderson, a writer from Chicago, Ill., visiting in the north, declared in an interview. Mr. Henderson, a free lance newspaper man, and fiction writer, has been searching for fiction color for a series of stories he is going to write on northern Manitoba's north country.

"The progress this country must have made in the past five years is startling," he declared, "Flin Flon and Sherridon are astounding communities to find far in the bush country north of the 54th parallel." "I considered I was fairly well informed on Canada's north country, but I have been astounded by the signs of industrial progress, the behaviour of citizens, and the great future that is apparent for these towns and cities," he remarked.

"Flin Flon will rank with any mine on the continent as a modern metallurgical plant and Sherridon will prove to be a rich producer," he predicted.

(By Eva A. Tingey.)

GRACEFULLY FALLING SKIRT

All Tingey models are created and sketched in Paris and the patterns are made in New York.

This model is especially nice for the woman of average full figure. The front in wrapped arrangement is decidedly slimming.

And into the bargain, it's such a simple easy dress to wear. It absolutely doesn't need any trimming.

The softly falling tunic flounce of the skirt is charmingly graceful.

The original model in dark green crepe patterned woolen is very serviceable.

It can be carried out in almost any of the new smart fabrics as canton crepe, maroon crepe, satin crepe, velvet and rayon novelties.

This pattern may be obtained in sizes 16 to 20 and 36 to 42. It is ready for immediate delivery. It is hand cut.

Sent 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Pioneer Captain Dead

Captain John Ward Templeman, 87, pioneer of the Great Lakes, died recently at Orillia, Ont. He was born in Lincolnshire, England, and came to Canada in 1860 on the brig "Seagull." He was engaged in the Great Lakes timber trade for many years and initiated navigation on the Magnetawan River at Burk's Fall, in 1885.

AWARDED PEACE PRIZE

Former Secretary of State Frank Kellogg, returning from Oslo, Norway, in Oslo he was awarded the Nobel peace prize for 1929 for the famous Kellogg treaty whereby war, as a means of arbitration, was outlawed by leading powers of the world.

All-Canada Phone System

Big Telephone Project To Link Halifax With Vancouver

As a result of the co-operative arrangements between the seven main telephone systems of Canada, the work is now proceeding to realize an all-Canada transcontinental system that will make it possible for a firm in Halifax to speak with one in Vancouver, a distance of 4,319 miles, without using lines outside of the Dominion.

At the present time a long distance call from Montreal to Vancouver would require a connection first with Chicago then with Seattle and from there to Vancouver.

Up to the present time it has been impossible to link western Canada with eastern Canada over an all-Canadian route. This has been partly due to differences in standard equipment of the various companies, but chiefly to the fact that what is known as "long" long distance service requires somewhat different equipment than the "short haul" traffic, such as large size copper wire, etc.

With a view to inaugurating the all-Canada service, large size copper wires have already been installed between Toronto and Winnipeg, while the three government systems of Manitoba, Saskatchewan and Alberta are now at work constructing such heavy duty lines preparatory to the introduction of the all-Canada service. British Columbia and Maritime organizations are also undertaking the work, so that in the near future the construction of the line from coast to coast is expected to be complete.

At the rate the work is at present proceeding, it is anticipated that by the summer of 1931 long distance messages may be transmitted from Halifax to Calgary, and by the spring of 1932, it is expected the entire coast to coast service will be in operation.

Marine Merger

World-Wide United States Shipping Service To Be Created

A world-wide shipping service under the United States flag will be created through a consolidation of interests of the International Mercantile Marine Company and the Roosevelt Steamship Company, which was announced in New York.

The merger, which has been rumored for several months, was announced by P. A. S. Franklin, president of the International Mercantile Marine. The Roosevelt Company, which was organized in 1925, will retain its corporate identity.

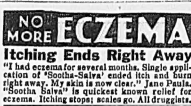

West Indies and Canada

Canada must assume a temporary role of "big brother" to the British West Indies if the full possibilities of trade between these parts of the Empire are to be attained, says a report issued by the Empire Club of Ottawa following a study of the subject. In other words, the report holds, Canada must spend a greater sum in the West Indies in order that the island citizens may be placed in a position where they can become heavy purchasers.

Has Done Some Walking

After walking a distance of more than four times around the world at the Equator during the last 35 years, Fred A. Dullahan, Central Vermont railway messenger, at St. Albans, is beginning his 38th year of hiking. He has averaged 10 miles per day, 300 days per year for 35 years, giving him a total walking mileage of 105,000.

Three pennies of Edward the Elder, 901-925 were sold in London recently for 755s.

Moose Jaw Grain Elevator

Dominion Government Grain Elevator Has Huge Storage Capacity

"Although the normal capacity of the Dominion Government grain elevator at Moose Jaw (exclusive of the new 2,000,000 bushel addition) is generally placed at 3,500,000 bushels," says "The Optimizer," "this amount of grain has been exceeded on several occasions during the past few weeks. On October 30th last, a total of 3,584,792 bushels of various grains were in store, while on November 13th there were 3,570,504 bushels and on November 22nd, there were 3,553,604 bushels stored up."

Recipes For This Week

(By Betty Barclay)

DATE AND NUT ROLL

1 1/2 cups sugar.
1/2 cup this cream.
1 cup dates, pitted and chopped.
3/4 cup nut meats, chopped.
Cook sugar and cream together until a little dropped in cold water forms a soft ball (238 degrees Fahrenheit). Add the chopped dates and cook two or three minutes more (242 degrees Fahrenheit). Remove from fire. Beat until candy begins to thicken. Add nut meats. Continue beating until candy is firm enough to make into a roll about one and one-half inches across. Wrap in a wet cloth and leave until cold. Remove cloth and cut crosswise in slices.

APPLE AND ORANGE SALAD

Peel and slice oranges, rejecting all white membrane. Cut wedge-shaped slices from red apples, without paring. Arrange on lettuce-covered salad plates, using alternate slices of orange and apple.

GRAPEFRUIT SALAD

Peel oranges and grapefruit and divide into segments, rejecting all white skin. Arrange a circle of orange segments on a lettuce-covered salad plate and fill centre with grapefruit segments.

Increased Hog Production

At a meeting of the Alberta Swine Breeders' Association the other day, S. G. Carlyle, livestock commissioner, remarked that present conditions in Western Canada pointed to a 100 per cent increase in hog production next spring.

Pay For Position

In some places where tips are abundant, the employee pays the employer for the right to work for him, declared a witness during a recent hearing before the ministry of labor commission in London.

SUNDAY SCHOOL LESSON

JANUARY 25

JESUS TEMPTED

Golden Text: "In that He, Himself, hath suffered being tempted, He is able to succor them that are tempted."—Hebrews 2:18.

Lesson: Luke 3:21 to 4:30.

Devotional Reading: Romans 8:31-39.

Explanations and Comments

The Nature Of Christ's Temptations, verses 1, 2.—Yielding to the control of the Holy Spirit, which had come to Him in a special way at His baptism, Jesus went from the Jordan into the neighboring wilderness, thence to be tempted by the devil. He was tempted in a special way at His baptism, Jesus went from the Jordan into the neighboring wilderness, thence to be tempted by the devil. He was tempted in a special way at His baptism, Jesus went from the Jordan into the neighboring wilderness, thence to be tempted by the devil.

The Temptation To Free Himself From the Limitations Of His Humanity, verses 3, 4.—During a long period Jesus had eaten nothing, and when He was hungry the devil said unto Him, "If Thou art the Son of God, command this stone that it become bread." The word "if" may be taken in the sense of "since": Since you have the power (Jesus had just been assured of this at His baptism), why not make use of it for yourself? The question which Jesus had to settle was, should He for His personal relief use power which was given Him for the sake of the kingdom, or should He trust His Father and accept whatever sufferings His Father might send? His answer was, "Thou shalt trust."

The Temptation To Establish an Earthly Kingdom, verses 5-8.—The Jews were chafing under the Roman yoke. They expected a Messiah who would free them from Rome, and establish an earthly kingdom greater than that of their fathers. What might Jesus not accomplish if He yielded to their expectations and established an earthly kingdom? All His countrymen would rally to His side if He adopted the role of a temporal Messiah; for such a Messiah they would sacrifice even their lives gladly. The devil showed Him all the kingdoms of the world in a moment of time. Jesus might have all this authority and the glory of them—if He would pay the price. Would it not be a quicker and easier road to travel than the road to Calvary? To seek temporal instead of eternal good, to build up a material instead of a spiritual kingdom, would be to ally Himself with the devil, to worship before him.

The Temptation To Presume Upon God's Call, verses 9-12.—Throughout His ministry Jesus was asked for a sign of His divine Sonship, but here at the beginning of His work He set that question once and for all: conscious as He was of His oneness with the Father, He would not make trial of Him to prove this to the world. To take comfort from the pinnacle of the temple was to rival a mountain goat or a chamois, but it had no counterpart in the world of men. It was a test of His power and ability to save men from their sins. To abandon the region of men's actual need and work wonders, not for their relief but for mere display, was to trespass against the Father's love and to mistake the Father's intention.—Marcus Dods.

The Tempter Vanquished, verse 13.—When the devil had completed every temptation, he departed from Him for a season. "The moment that the obedience of the life was established, the mental tumult settled into peace within him."—Phillips Brooks.

Exponent Of Perpetual Motion

Inventor At Pacific Coast Thinks Invention Will Revolutionize Industry

The Vancouver Sun publishes the following despatch from Prince George, B.C.:

"Prince George has now an exponent of perpetual motion in the person of Nicola Schmidt, a local engineer, who claims to have invented an engine operating by a mixture of water and air, which requires the expenditure of no oil whatever. Mr. Schmidt claims that his engine will occupy about one-third as much space and weighs about one-half as much as the most efficient power plant, and that once it is installed there will be no further expense whatever. Mr. Schmidt is highly secretive as to the principle upon which his engine operates, but his business manager, H. A. Hurtubise, announces that the engine will revolutionize industry.

Saskatchewan Resources

National Resources Office For Northern Saskatchewan Located At Hudson Bay Junction

One of the three natural resources offices in Northern Saskatchewan has been located in Hudson Bay Junction. E. J. Marshall, who has been in charge of the Porcupine reserve for some years, has moved to the Junction, and has been promoted to district superintendent. His district extends from the Manitoba boundary to the south to the Churchill River. All matters relating to the forests, lands, mines and fisheries in this part of the province are to be administered from the local office.

A toy automobile, whose six-cylinder engine has real moving parts, has appeared in Paris.

Sweet apple cider is found to have about the same food value as apples.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

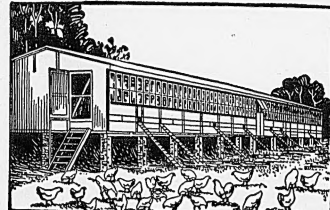

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 35 inches wide only.

TORONTO, ONT.

BRITISH FILM GUILD IS FORMED IN CANADA

Toronto, Ont.—Announcement was made recently of the organization of the British Film Guild in Canada, an independent organization of Canadian theatregoers, interested in seeing British and Canadian pictures in Canadian theatres. The Guild has an initial membership of 150 people and is now conducting a mail poll for the election of officers.

Believing the vagueness surrounding specific activities of British studios, the personalities of stars and directors, what British films are currently available for Canadian showings and how they appeal to Canadian tastes, to be one of the major handicaps to British films progress in Canada, the Guild hopes to act as a clearing house for information, the announcement said.

Its appointees will preview incoming British films and send frank comments to the membership at large.

Members as a whole will report on British films they see and a summarized symposium of Canadian opinion will be sent to the British producer for his information as an indication of Canadians' film entertainment. Statistics on British films will be compiled with a notation of where they were shown, audience reactions and degree of box office success in each case. Co-operation of British producers in such things as arranging previews has, it stated, been obtained.

Decision On Freight Rates Re-Affirmed

Railway Board Explains Method Of Computing Reduction In Maritime

Ottawa, Ont.—A re-affirmation of their former decision as to the correct method of computing how the 20 per cent. cut in maritime freight rates should be arrived at is contained in a judgment of the board of railway commissioners, delivered here.

The judgment decrees that on west-bound freight traffic, that point of origin whose lies within the "select region," the reduction shall be calculated on the ratio which the distance between that point of origin and the westerly limit of the "select area," Diamond Junction, bears to the whole distance from that point of origin to the ultimate destination. That is to say, a commodity transported, for example, from Moncton, N.B., to Calgary, Alta., enjoys the 20 per cent. freight reduction not on the entire Moncton-Calgary rate but on that proportion of the Moncton-Calgary rate which that commodity bears on the distance between Moncton and Diamond Junction, or Lévis, Que.

Talks To Buenos Aires

Prince Of Wales Telephones Across 6,500 Miles From London To Argentine

London, England.—The Prince of Wales picked up his telephone in York House and sent his voice across 6,500 miles to Buenos Aires, talking for seven minutes with Sir Herbert Gibson, chairman of the British trade exhibition, which the Prince will open in the Argentine capital March 14.

So clear was the transmission that friends sitting near the Prince could hear what Sir Herbert said. First he read a message of welcome to the heir and then there was an informal chat.

To Improve Potato Crop

Winnipeg, Man.—Potato growers of Manitoba were urged to use certified seed and to strive to produce No. 1 grade crops, by John Tucker, chief potato inspector of the Dominion, who addressed the board of trade's agricultural bureau recently. Manitoba's production in the last 10 years, he said, averaged 135 bushels per acre, which he considered low.

Will Celebrate Diamond Jubilee Victoria, B.C.—British Columbia will celebrate her diamond jubilee with all the pomp and circumstance befitting the occasion, at the capital of the province on July 20 this year. It was on July 20, 60 years ago, the Crown Colony of British Columbia was formally included in Confederation.

U.S. Motor Vehicle Deaths Chicago.—There was 32,560 motor vehicle deaths in the United States in 1930, the National Safety Council estimated recently. This figure represented an increase of approximately 1,300 deaths over the 1929 period.

Courage Needed Says Federal Woman Member

Miss MacPhail Thinks Representatives In House Should Follow Their Conscience

Brantford, Ont.—"You can take your conscience into the House of Commons, but to keep it there—oh, boy!" commented Agnes MacPhail, M.P., in an address here, after reviewing the attitude of the members toward a woman colleague.

Miss MacPhail declared that there was great need today in parliament for members to follow their own consciences, and courage to stand for what was right, irrespective of party or the big interests. The House, she said, "badly needed Rt. Hon. Arthur Meighen and Hon. Charles Dunning, two men of courage."

She declared that prosperity could not be secured by injecting life into one or another industry as with a hypodermic needle, but was dependent on the prosperity of all.

British Shipyards Busy

Built Over Third Of World Construction During Last Quarter-Year

London, England.—Well over one-third of the total shipping under construction in the world in the quarter-year ending December 31, was in British shipyards, according to Lloyd's quarterly report. The exact percentage was 39.1 out of a total of 2,326,086 tons. The only figures not taken into account are the comparatively small tonnages building in Russia, which does not supply statistics.

The number of ships being built in Great Britain in the period was 181 with a total tonnage of 908,802. This was a decrease of 207,844 tons from the previous quarter, and 651,352 tons less than in the same period of 1929.

Of the foreign tonnage under construction, 232,030 was recorded in the United States, 281,215 in Germany, 179,677 in Italy, 174,215 in France, and 160,078 in Holland.

Opening Of Manitoba's Legislature Announced

January 27 Date Decided On At Cabinet Meeting

Winnipeg, Man.—Manitoba's legislature will open Tuesday, January 27, Premier John Bracken has announced. Decision to commence the session on this date was reached at a cabinet meeting.

Unemployment relief measures upon an important subject for the session. Re-adjustment of provincial taxation to enable the government to reduce the municipal levy by one-half is another important piece of business to be discussed by the members of the legislature.

Expect Improvement In Fishing Industry

Comprehensive Survey Being Carried Out By Fisheries Department

Halifax, N.S.—A marked improvement and more stable conditions in the Canadian fishing industry are expected in the reasonably near future by Hon. E. N. Rhodes, minister of fisheries.

Speaking of the survey of the industry being carried out by the department, Hon. Mr. Rhodes said it was of such a comprehensive character that it could not be completed before next August. A study of market conditions at different seasons of the year was one of the factors involved.

Question Of Gold Payment

Paris, France.—The answer of the French Government to the last British note relating to the payment in gold of the French war loan, which will be remitted soon, will constitute a courteous refusal to submit the differences to the exceptional procedure of arbitration, when normally competent jurisdiction had not been invoked, it was reported recently.

Racer Sails For States

Southampton, England.—Capt. Malcolm Campbell, British automobile racer, sailed on the "Homeric" for New York with his racing car, the Bluebird. If arrangements for his speed trials at Daytona Beach, Fla., at present somewhat confused, are not settled, he said he is ready to go on to New Zealand.

Is Canadian Firm

Toronto, Ont.—Dumont Motors of Canada, Limited, is now owned, controlled and operated by Canadians, it was announced by Roy D. Kerby, president and general manager of the company. The announcement said the company is now probably the only automobile company in Canada so controlled and managed.

Advocates Fruit Growing

Manitoba Farmer Says More Money In Fruit Than In Grain

Winnipeg, Man.—A pioneer fruit grower of the prairies told delegates to the annual convention of the Manitoba Horticultural Association recently, that fruit growing should be regarded as a profitable field by farmers.

His four acres of crab apples, plum and hybrid cherry trees netted him a greater profit last year, William Shepherd, Rathwell, Man., said, than 300 acres of grain would have. Mr. Shepherd considered fruit farming had a bright future in Manitoba.

HUGE TELEGRAPH MERGER MAY BE ARRANGED

Montreal.—Amalgamation in a \$50,000,000 corporation of the respective commercial telegraph systems of the Canadian Pacific Railway and the Canadian National Railway is being considered by the two parties. The Canadian Press understands the proposal has also been put before the Dominion Government at Ottawa. This is the much larger idea behind the statement in Ottawa of Sir Basil Blackett, chairman of Imperial and International Communications, Limited, "that the Canadian Pacific and the Canadian National shall become partners with the I.L.C. in forming a Canadian overseas communication company, which shall include the Canadian Marconi Company."

The suggested amalgamation presents obvious advantages and no less obvious disadvantages. Economically, there would be the saving in the present duplication from coast to coast in equipment and personnel, but even more important would be the advantages of a strong, all-Canadian corporation, able to meet competition and hold its own against all comers.

For neither of the two Canadian commercial telegraph companies is really independent, because each is necessarily allied and more or less dependent upon one or other of the rival United States communication groups, the Western Union and the Postal, which again results in the bulk of overseas going through foreign rather than British channels.

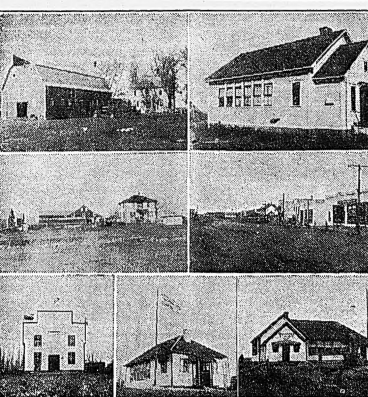

This strong corporation would operate at a much lower cost and therefore at lower rates to the permanent advantage of the Canadian public. At the present time, eight commercial telegraph zones are strung across the Canadian continent, and a message, to pass from one to another and beyond, makes an increasingly higher rate, constituting a heavy toll on the economic life of the country. It is probable that such an amalgamation would permit of the cutting down of these eight zones to only three: Eastern zone, from Cape Breton to the Head of the Lakes; Central zone, Head of the Lakes to Regina; Western zone, Regina to Victoria. In other words, commercial telegraph traffic would have to bump over only two coast summits as from coast to coast, instead of over seven, while the great area of Eastern Canada would enjoy a flat rate.

The latest recruit to the local pit is Arthur Cullen, Canadian-born and long called king of the traders, who Tuesday, January 13, bought a seat on the Winnipeg Grain Exchange. While his interests traded here before, this is the first time Mr. Cullen has been a qualified member of the Exchange.

Cullen is understood to have paid \$12,000 for his membership.

Ferguson High Commissioner Ottawa, Ont.—Canada's new High Commissioner in Great Britain—Hon. G. Howard Ferguson—became a member of the Canadian Privy Council, January 14. Accompanied by Premier R. B. Bennett, the High Commissioner proceeded to Government House and in the presence of His Excellency took the oath as a privy councillor.

Winning Manitoba Communities in C.N.R. Progress Contests

Completion of the first year's contests in the Canadian National Railways community progress competitions for European settlements in Manitoba placed Rossburn, Ukrainian, first; Steinbach, Mennonite, second; Rhineland, Mennonite, third; Ethelbert, Ukrainian, fourth, and Stuartburn, Ukrainian, fifth. Above pictures show: (1) Residence of Jacob Schollenberg, Rhineland; (2) Elmhurst school, Steinbach; (3) A. Penner's farm home, Steinbach; (4) Main street of Ethelbert; (5) Community Hall, Rossburn; (6) Byrd school, Rossburn, and (7) King George school, Rossburn.

PHYSICAL EDUCATION EXPERT

Captain Robert Jarman, now of Manitoba, physical education expert, who has just finished a series of demonstrations of his teaching methods in Toronto. He may be brought to Toronto when his Manitoba contract expires.

Gift From Lord Willingdon

Governor-General Presents Car To Children's Aid Society, Ottawa

Ottawa, Ont.—Ottawa's needy children are to have a handsome automobile of their own—the gift of the departing Governor-General and Viscountess Willingdon.

The generous presentation was made by Their Excellencies to Mrs. C. H. Thoburn, prominently identified with several organizations having to do with child welfare. In tendering the auto, of an expensive make and brought to the Dominion when Lord and Lady Willingdon first took up residence here, Their Excellencies voiced a desire that it be devoted to the use of the children for their various outings.

The car will be used by Ottawa's young folk, under direction of the Children's Aid Society.

Buyers Seat On Grain Exchange

Arthur Cullen, Chicago Operator, Pays Good Price For Entry To Winnipeg Pit

Winnipeg, Man.—With wheat de-throned as king in the Chicago grain pit, big operators there are transferring their activities to the Winnipeg Grain Exchange.

The latest recruit to the local pit is Arthur Cullen, Canadian-born and long called king of the traders, who Tuesday, January 13, bought a seat on the Winnipeg Grain Exchange. While his interests traded here before, this is the first time Mr. Cullen has been a qualified member of the Exchange.

Cullen is understood to have paid \$12,000 for his membership.

Ferguson High Commissioner Ottawa, Ont.—Canada's new High Commissioner in Great Britain—Hon. G. Howard Ferguson—became a member of the Canadian Privy Council, January 14. Accompanied by Premier R. B. Bennett, the High Commissioner proceeded to Government House and in the presence of His Excellency took the oath as a privy councillor.

Wheat Exports Increased

Canada Exports More Wheat During Past Nine Months Than During Same Period Previous Year

Ottawa, Ont.—At the three-quarter mark in the present fiscal year Canada had exported considerably more wheat than during the corresponding period last year, but the amount realized from the business was appreciably lower, figures issued through the department of national revenue show that the Dominion exported 184,442,015 bushels of wheat during the nine months just closed, for which the sum of \$187,755,170 was realized. In the corresponding nine months of 1929-30 the total quantity exported was 153,687,017 bushels, valued at \$187,722,619.

Both exports of domestic commodities and imports into Canada suffered a big decline in the nine months just ended. Total imports during the nine months just ended were \$729,931,812, as compared with \$909,665,518 in the corresponding period of 1929-30. Total exports of Canadian produce during the past nine months were to the value of \$656,113,965 as against domestic exports during the nine-month period of last year, which totalled \$890,465,841.

Mounties Will Visit Argentine

Four Picked Members Of Force To Be In Charge Of Canadian Exhibit

Winnipeg, Man.—Four picked members of the Royal Canadian Mounted Police will sail for Buenos Aires on the Canadian National steamship "Prince Robert" from Halifax on February 21, according to advice received here. They will be in charge of the Canadian exhibit at the British Empire Trade Fair and will in themselves be a splendid advertisement for the Dominion.

The large Canadian delegation will also sail for South America on the "Prince Robert." The men selected are not from Saskatchewan.

BID WILLINGDONS FAREWELL ON LEAVING CANADA

Ottawa, Ont.—Ottawa said "good-bye and good luck" to Their Excellencies Viscount and Viscountess Willingdon. In the brightness of a sparkling sharp Canada winter day, prominent representatives of the political, diplomatic, business and social worlds of the Dominion gathered to bid farewell to the Governor-General and his wife, who, for more than four years, have lived among the Canadian people. Bright uniforms of the soldiers, who constituted travelling escort and guard of honor for Their Excellencies, flags and bunting, and a large wreath of beautiful roses with its message of "Good Luck" added colour to the scene.

Headed by Rt. Hon. R. B. Bennett, prime minister, members of the Dominion cabinet were present to shake the hands of Viscount and Viscountess Willingdon for the last time. Rt. Hon. W. L. Mackenzie King, Liberal leader; Hon. G. Howard Ferguson, newly-appointed high commissioner for Canada in Great Britain; Hon. Vincent Massey, former Canadian minister to Washington, representatives of foreign governments in Ottawa, and others prominent in various walks of life in the Dominion were among the crowd which gathered at the station.

After the last farewells were said, as the train moved slowly away from the carpeted stairway up which Their Excellencies had walked to the rear platform of their private train, the band of the governor-general's foot guards struck up the National Anthem, and in a minute changed to the familiar strains of "Auld Lang Syne." The crowd broke into cheers, Their Excellencies waved farewell, and the train pulled away.

Viscount and Lady Willingdon will spend a couple of months in England before leaving to take up their new duties in India.

From Government House, which Their Excellencies left shortly before noon to drive in the state car to the Central Station, a travelling escort of the Princess Louise Dragoon Guards accompanied them. Boy Scouts lined the drive through which the vice-regal party drove in the Government House grounds. His Excellency was Chief Scout for Canada.

Accompanying Their Excellencies were E. C. Mieville, private secretary, and Mrs. Mieville, Col. Humphrey Snow, controller of the household, and members of the staff. Mr. and Mrs. Mieville will go to India with Lord and Lady Willingdon.

EARTHQUAKE CAUSES HAVOC IN MEXICAN CITY

Mexico City.—Soldiers were turning over the wreckage of the thriving city of Oaxaca, carrying out the bodies of men and women who perished in the earthquake which rocked Southern Mexico.

At least 12 persons perished and many more were injured. Telegraphic communication was impossible and radio messages irregular. The city itself, fragmentary messages said, was in ruins and panic-stricken people slept in the open, despite intense cold, because they were afraid to go back to such homes as were left standing.

The only clear picture of the disaster came out of the ruined city in a message to President Ortiz Rubio from General Evaristo Perez, military commander of the state of Oaxaca.

It was he who said that at least 25 persons had been killed or injured. Another message to the department of communications said that 12 had been killed, but this could not be verified immediately.

"It is impossible to describe the confusion here," the general's message said. "The loss is incalculable. At least 25 persons have been killed or injured and we are still discovering bodies of the dead."

The general's home was destroyed and he was living in his automobile, he said. The military barracks were in ruins and a colonel of cavalry was one of those killed. The police were helping the soldiers to search the ruins for additional victims.

Epicenter of the quake, which struck Oaxaca was placed a few miles northeast of the city. Mexico City itself was shaken for four minutes, and one person was killed and 25 injured. There also was considerable property damage.

Revenues Decrease

Ordinary Revenues For Canada Decreased By \$66,000,000 In Nine Months Period

Ottawa, Ont.—Ordinary revenues of Canada decreased by \$66,000,000 approximately for the nine months ended December 31, last, as compared with the corresponding period in 1929. During the past nine months' period, according to the official financial statement issued recently, ordinary revenues totalled \$285,221,051, as against \$351,287,325.

Ordinary expenditures increased by \$15,000,000 in the period under review. For the nine months ended December 31 last, ordinary expenditures amounted to \$290,722,205 as contrasted with \$285,141,767 for the period of 1929.

The statement represents only the receipts and payments which have passed through the books of the department of finance up to the last day of the month.

The net debt of Canada, according to the statement, shows an increase. On December 31 last, the net debt was \$2,109,749,531, as compared with \$2,159,214,730 on December 31, 1929.

New Commander Appointed

Lieut. Hart Will Take Canadian S.S. Vancouver On Winter Cruise

Ottawa, Ont.—Lieut.-Commander Frederick G. Hart, R.C.N., has been appointed to the command of H.M.C.S. Vancouver. His appointment took effect on January 20 and he will take the "Vancouver" on its winter cruise to United States and other foreign ports, leaving Esquimalt, B.C., on January 26.

Lieut.-Commander Hart joined the Royal Canadian Navy during the war as a cadet at Halifax and was promoted to lieutenant commander in 1928. He qualified for command of destroyers while serving in the Royal Navy in 1929.

To End Slavery In Liberia

Washington, D.C.—The United States would be willing to associate itself with the League of Nations in setting up an international commission to end slavery in Liberia, the United News learned recently from a high official.

Feels Germany Breaks Promise

Paris, France.—A conference of ambassadors here is believed to have discussed the question of German armaments, with the impression prevailing that Germany has allegedly failed to fulfill all disarmament promises under the Versailles treaty.

Homestead Entries Increase

Edmonton, Alberta.—According to Provincial Government figures homestead entries and soldiers grants for the month of November amounted to 758 as against 553 for the same period last year.

Future Looks Encouraging

President Beatty of C.P.R., Reviews Economic Position of the Dominion

Railway earnings, which have shown a drop of some 16 per cent. during the past year, can reasonably be taken on as indicating the total decline in Canadian activity during the same period, states E. W. Beatty, president of the Canadian Pacific, in his annual review of the economic position of the Dominion.

Mr. Beatty believed the wheat situation has been responsible for at least half of the decline, and that with the marketing at a fair price of the wheat now in the country, there would remain only a few unimportant barriers to better conditions.

Mr. Beatty sees encouragement for the future from the way in which industry hitherto has comparative unimportance in Canada, as assuming a leadership in the economic scheme of things. He recalls that 50 years ago the total mineral production in Canada was valued at about \$10,000,000, whereas in 1929 it was more than \$310,000,000.

Touching on depressions in former years, Mr. Beatty says that 50 years ago, at the time of the inception of the Canadian Pacific Railway, Canada had been suffering from a depression which, in fact, was more complete than that which is now being experienced. At that time lumbering was the dominant activity, agriculture was just emerging from the pioneer stage in the older districts, the market for farm produce was extremely limited and prices no less so, and the other industries of the country were in an elemental stage. The natural resources of the north were quite unknown, and those of the west only guessed at. Another depression came when the western "boom" broke, and wheat fell as low as 35 cents a bushel. The country had weathered these storms successfully, Mr. Beatty said.

Trouble With Mathematics

More Pupils Failed In This Subject Than Any Other

To the rising generation as to the old, multiplication is apparently still vexation and the rule of three the school's chief perplexity. More pupils failed in mathematics in the New York high schools during 1929 than in any other subject, according to the report of the city superintendent recently issued. In one school more than half the pupils failed first-term algebra, while failures in high school mathematics as a whole totaled 25.3 per cent. On the other hand, less than 5 per cent. failed in music and domestic science and 13 per cent. in English, though foreign languages demanded a student toil second only to mathematics.

Silver Fox, Muskrat, and Mink

Ten years ago the total value of fur-bearing animals on fur farms in Canada was placed at \$4,723,105. The industry today represents a capital investment of practically four times as much as in 1920. As one might expect, the silver fox heads the list with a capital investment of \$14,922,278—an increase of \$10,400,000 over 1920. The next on the list is muskrat, with an investment of \$562,749, and the third mink with \$328,282 invested.

A Sure Preventive

A Scotsman who was a bad sailor was crossing the Channel. He went to the Captain and asked him what he should do to prevent sea-sickness.

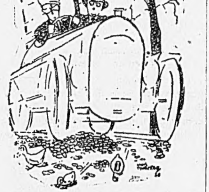

"Have you got a sickness?" asked the captain.

"Aye" replied the Scot.

"Well, hold it between your teeth during the trip."

He (sarcastically)—Do you call that thing on your head a hat?

She (icily)—Do you call that thing in your hat a head?

"Don't drive so quickly—are you not afraid of an accident?"

"It doesn't matter—I have another car."—Moustique, Charleroi.

W. N. U. 1873

Learned Lesson From Child

Boy Taught Father How To Answer His Own Prayer

A good many of the prayers we offer on behalf of the poor and destitute can be answered by ourselves without bothering the Lord.

A story was told on the radio that might well cause us to sit up and think. A certain successful farmer who prayed every day for the destitute had a young boy of whom, naturally, he was both proud and fond. Each day the father would knock off work for an hour to play with the boy. They would be policeman, soldier, sailor, teacher, preacher, etc., in turn. One day the farmer was called away on business in Boston, and on his return trip was startled by profuse thanks proffered by several neighbors he met. One was so thankful for the apples, another for the potatoes, and so on. The farmer said nothing, but accepted the grateful expressions. He did, however, stop on the gas and hurry home to ascertain what it was all about. He hustled straight to the barn and storehouse to discover that not a potato was left, and every apple had disappeared. Why not? For on the gate was a crude sign in boyish printing: "Apples and Potatoes Free. Anybody Needing Them Come In."

Of course he went after little Peter, demanding why he had given away all the apples and potatoes. "Well, Dad," the boy answered between sobs, "I was just playing I was God. What do you mean, my boy?" "See, Dad, even did you pray to God to supply the needs of the poor people, and I just played God and answered your prayers."

The farmer recognized the point and afterwards told the Lord less about the condition of his neighbors, and went about helping them.

They All Come To It

Advertising Best Method Known To Build Up Business

Following in the footsteps of the department of national revenue, and the federal government, the department of fisheries has decided that its work can be made truly effective by the use of newspaper advertising. It is announced that the minister of fisheries has agreed to spend \$25,000 on advertising to increase the consumption of Canadian canned salmon. By an agreement in which the canners agree to spend a like sum, dollar for dollar with the government. In a dispatch which followed on one referred to above, the information was given that the Ontario Retail Druggists' Association has decided to establish during the year 1931, a vigorous campaign of newspaper advertising, designed to emphasize the fundamental difference between the drug store and other retail stores. Above are cited only two instances of how newspaper advertising is to be used for education and business-building purposes combined. The salmon packers of British Columbia are being hard pressed to secure markets, so the government is going to help them secure these by the most logical method known, the use of newspaper advertising. The druggist often finds that the professional side of his business is overlooked by those who simply regard him as a retail merchant, so, through his association, he proposes to tell the world all about what he has to offer.

Some Good Excuses

Given By People To Avoid Paying Income Tax

An Oriental replying to a demand for income tax returns, wrote that he was selling shoelaces and "if you can show me how to get much income on my business, I am very like pay tax." A newlywed asking for an extension of time to pay taxes, explained: "The lowest financial cycle in a man's life is six months after standing before the altar and saying 'I will.'" A Scot went in asking for a deduction of \$1.04, representing two-cent stamps which he had affixed to his pay cheque each week and forgot to deduct from his income-tax return.

Mining In Manitoba

With the progress that has been made in railway construction, mine development and exploration, northern Manitoba, and more particularly that area adjacent to the Saskatchewan boundary, is taking its place among the mineral producers of the Dominion.

Not So Enthusiastic

Friend: What did the audience say when you told them you had never paid a dollar for a vote?

Politician: A few cheered, but the majority seemed to lose interest.

Postal savings in Japan are increasing at the rate of \$25,000,000 a month.

A Growing Service

Valuable Work Carried On By the Plant Inspection Service

When first started in 1919, roughly ten years ago, the plant inspection service of the Federal Department of Agriculture examined a total of 876,466 plants imported into Canada. Last year this service reached the huge figure of 48,044,686 plants imported into Canada from other countries, an increase of 5,000,000 plants over 1928. These importations had an estimated value of \$1,583,103. In the course of the work 15,806 permits were issued and 9,316 inspections made. As a result of this service a total of 908 diseased plants and insect pests were detected. The pests intercepted included caterpillars, scale insects, borers, bulb flies and mites. In sixty cases the plants involved were refused entry, and in 504 cases shipments were returned to consignors as not having been properly inspected for pests and diseases in the country of origin.

In addition to this service inspection of mail parcels amounted to 2,966 examinations of 3,515 containers in all. A total of 383,244 plants arrived in Canada in this way.

The inspected service also covered plants brought into Canada by passengers on boats. During the fiscal year 1929-30 a total of 3,927 boats were visited and on these 182 passengers were found to have plants with them. In twenty-five instances potatoes being brought in from Europe were intercepted and confiscated.

Nursery stock exports to a total of 942 shipments to twenty-one different countries were also inspected, representing an increase of three hundred per cent. in the quantity of nursery stock sent out from Canada. This material included 245,361 bulbs, 408,661 ornamentals, 130,335 fruit trees, 15,683 conifers, 5,817 pounds of tree seed, 1,000 pounds of onion sets, 1,000 square yards of sod and 97 vegetable roots.

Fixing Quality

Government Inspectors Pay Visit To Canning Factories

One of the most valuable of the services provided for the protection of consumers in Canada as well as for advantage to growers who produce high quality products is the commercial inspection service of the Fruit Branch. During the past fiscal year staff inspectors made 3,300 visits to 414 canning plants throughout the Dominion, issuing 2,400 certificates covering products from which 694 samples were taken; these include:—

Cases	477,000
Tomatoes products	477,000
Peas	22,100
Corn	11,410
Pears	64,700
Evaporated apples	40,820

The federal inspection service determines the quality of the product, which is required by statute to be marked on the label affixed to every can of product offered for sale in Canada.

Grades For Rhubarb

Three Recommended Grades For Home Plants

The Dominion Fruit Branch has introduced three recommended grades for "forced" or hothouse rhubarb, these are: "Canada Fancy," not less than three inches in circumference; "Canada No. 1," not less than two inches; and "Canada No. 2."

The branch has also suggested three types of container as standard for the marketing of rhubarb: (a) a standard box or basket containing twenty-five pounds net; (b) a box containing ten pounds net, wrapped in wax or cellophane paper; and (c) a veneer box holding twelve pounds net.

More Eggs Laid

During the ten years since Egg Laying Contests have been conducted by the experimental farms branch of the Federal Department of Agriculture a steady increase in the volume of egg production is noted. In 1929 the average of 2,526 birds trapped in these contests was 176.5 eggs per bird, an increase of fifty-four eggs per bird over 1919.

Father (angrily): "Did I see you kiss my daughter, young man?"

Youth: "I really cannot say. I was fully occupied at the moment."—Hummel, Hamburg.

Smallpox And Vaccination

Process Of Preparing The Vaccine Is Very Interesting (By John Burke Ingram.)

In our last article I told you how Edward Jenner, one of mankind's greatest benefactors, discovered how to prevent smallpox. I told you how one person in ten died of this disease prior to his discovery, and how, in the eighteenth century, 60 million Europeans died from it. I told you how the Sovereigns and leaders of Europe, how Parliaments and people all over the world poured honors upon the great Jenner. Today I should like to tell you just exactly what vaccination is, how the vaccine is secured, how it is administered and a few other interesting facts about mankind's greatest safeguard against one of the most horrible diseases that ever afflicted the human race.

In the first place, doctors secure a healthy calf. From the time they select the calf till the moment of its painless death, it becomes one of the most favored of animals. It leads the life of Riley or whatever the bovine equivalent to the life of Riley may be. It is bathed gently and carefully, it is excellently fed and cared for, kept clean and healthy. Then they vaccinate it with the germs of cowpox. This gives the calf a mild case of cowpox. Then what happens? Because the calf is healthy its body begins to fight the cowpox germs and it develops what are known as antibodies in order to fight these germs. It is these antibodies that the doctors want to be developed in the blood of human beings; they produce a reaction which enables the human blood to successfully fight smallpox germs; so these germs are not even permitted to begin their work of causing smallpox.

The process of preparing the vaccine is very interesting. When the calf is ready the doctors chloroform it, wash off that particular part of its skin upon which the vaccine virus has appeared. (This process of washing with water is used.) The doctors then examine the calf, make sure that its internal organs are absolutely free from disease. If this examination shows any diseased condition, all the time and effort expended up to this point are wasted because they have to start in all over again with another calf.

What the doctors have got from the calf is called green virus. From it every bit of bacteria has to be removed. It is carefully ground with a mixture of glycerine and carbolic acid through a fine sieve, brown wire gauze. All germs are thereupon killed. What is left is a creamy substance which is kept on ice until ready to be used on human beings, but first it is thoroughly tested on animals. So you see how careful doctors are in preparing this health-preserving substance. Now let us consider for a moment the claims of busybodies who oppose vaccination and allege that it is harmful. One of the claims that these people make is that arms rot off, and all sorts of terrible things of that sort happen after vaccination. Dr. Hastings, for many years medical officer of health in the City of Toronto, and one of the best-known public health officials on the Continent, recently said:

"Of approximately 250,000 vaccinated in the city I defy anyone to produce evidence of one single death that has been brought about by vaccination. I defy them to produce a case where an arm was even threatened. There is not as much danger from infection from vaccination as there is danger from the scratch of a pin." Dr. Victor Heiser, of the Rockefeller Foundation, said in a letter to the Social Hygiene Council: "Ten million vaccinations were made in the Philippines without loss of life or limb. Foreigners who were unvaccinated invariably contracted smallpox. I recall especially that several who declined vaccination died within a short period after their arrival on the islands. Prior to vaccination, there was an annual death rate from smallpox of approximately 40,000. Upon the completion of the 10,000,000 vaccinations referred to above, this death rate was reduced to a few hundred, and these deaths occurred almost entirely among persons who were unvaccinated."

Just An Oversight

There is a story told about a chap who was engaged to look after a lighthouse at a deserted and dangerous place along the Atlantic coast. After three months he was discharged without notice, and was greatly upset.

"I don't know why the Government fired me," he told a friend. "I'm a steady worker, never smoke, never drink—have no bad habits. All I ever forgot to do was to light the lamp."

Advocates Special Training

Properly Trained People Mean National Success Says Ontario Premier

"We are on the verge of, if not actually entered upon, one of the most critical ages in the history of the world," declared Premier George S. Henry recently. "And the nations which will succeed are those with trained populations — with people trained to produce the best, in the most economical method possible."

The premier of Ontario was giving his fullest encouragement to educationists, who gathered from many parts of Canada, met at a dinner in Toronto, and opened discussions on the formation of a Canadian educational guidance movement.

"The directing of the youth of the nation from the school into the lines of endeavor each scholar, boy or girl is best fitted for, it aims at that animated discussion."

"If we strike out this new line and get the results which are confidently expected, we will reap in the end a world reputation that will stand to our credit," Premier Henry said. "With a properly trained population, with the elimination of ill-effects, we can be equal to, if not superior, to anybody."

Premier Henry, following addresses by President Sherwood Fox of Western University, London, Ont., and Principal Charles Bishop of Alberta College, Belleville, said he believed there would be a national call for such an organization as was proposed.

He expressed some doubts whether young people were not sometimes being encouraged to follow higher education when some of them were obviously much better directed into some livelihood they were more fitted for, in which they would be better off than if they finished up by being "misfits" in other lines of endeavor.

Manual labor was still a good thing, the premier said. He echoed the sentiments of Dr. Sherwood Fox who, in referring to the lowering of some of the barriers to Canadian endeavor in other lands—notably the restrictions upon immigration to the United States—pleaded for proper placing of Canadian youths in Canadian endeavors.

"We can find employment for our young people," Premier Henry promised. He rather believed in putting down the bars when it came to Canadian youth seeking an outlet in other lands, he admitted. Perhaps not sufficient thought had been given to the question of placing youth after education had been completed.

Pure-Bred Sows

Orders For More Than 500 Sows For Breeding Stock Have Been Received

More than 500 orders for pure-bred sows for breeding purposes have been received by the Dominion Department of Agriculture since Hon. Robert Weir, the minister, announced the new policy in November. A. A. MacMillan, chief of the sheep and swine division of the department, said the scheme now is operating throughout the Dominion and, besides the orders received, many enquiries are being made by farmers in all sections of the country.

Largest number of orders has come from Saskatchewan and Alberta. Mr. MacMillan said, due probably to the abundance of low grade feed available there for stock. The object of the scheme is to increase the exportable surplus of bacon and pork products through assisting farmers to improve the quality and type of the breeding stock. The farmer receives a specially selected animal of suitable type at cost, plus one-half the cost of freight from the stockyard to his farm.

In commenting on the scheme, Mr. MacMillan said one of its features was the interest being taken by farmers who were turning to hog-raising for the first time as a supplement to their ordinary farming operations.

Travelled Long Distance

We like a story that was very popular with the army in France.

It is the tale of a negro who was beating it for the back areas as fast as he could go, when he was stopped by a white officer.

"Don't delay me, sah," said the negro. "I's gotta be on my way."

"Boy," replied the officer, "do you know who I am? I'm a general."

"Go on, white man, you ain't no general."

"Certainly not," insisted the officer, angrily.

"Lor'dy!" exclaimed the negro, taking a second look. "You sure is! I must be travelling some, 'cause I didn't think I'd got back that far yet."

The new brake that can stop a seventy-miles-an-hour car in twenty feet is almost as good as a telephone pole.

The Unattainable

Mystery Of Life's Origin and Purpose Remains A Riddle

From the time when people lived in caves, there have always been certain men who choose to cut loose from all divine writings and revelations and seek for themselves, the secret of the origin and purpose of life.

Their searchings have added a good deal to the sum total of human knowledge, to be sure. But the plain, matter-of-fact explanation they seek has always eluded them.

Now comes Professor C. Lovatt Evans, one of England's foremost scientists, to announce that the mystery of life's origin and purpose will never be solved by any scientist. Always, he says, there will remain an ultimate riddle that no laboratory worker can answer.

Perhaps this is because people, after all, aren't really matter-of-fact or commonplace at all.

Study your fellow-man in the mass, day by day, and you may see nothing extraordinary about him. He is, at times, quite mean and blind and selfish and ignorant and cowardly. You are almost persuaded that there is no trace of divinity in him—that he is, after all, only an animated clod.

Then, if you get the proper perspective, you begin to see things.

You see, beside the ignoble qualities, strange capacities for sacrifice, endurance, courage, fidelity, hope.

You see a moor in the slums starving himself to provide a little extra food for the child.

You see an underpaid factory drudge, working his life away so that people who depend on him may live.

You see a man with a vision giving up riches and honor in order to make the world a better place for men and women who are not yet born.

You see men fighting poverty, sickness and hunger in order to pursue some glimpse of truth.

You see men weaving songs and snatching words from the words while cities go down in flames about their ears.

And, now and then, you hear battle trumpets and see flags waving, and thousands upon thousands of men step up, without hesitation, to die at someone else's bidding in the vague hope that somehow the world will be made a bit better thereby.

Will you keep on looking, then, for a matter of fact explanation? You will not—not if you are wise. You will recognize, instead, a great mystery, made radiant by distant flames.—Vancouver Sun.

Profits In Milk

Lethbridge Experimental Farm Gives Some Interesting Figures

There should be special interest for prairie farmers in the figures with respect to milk production supplied by the annual report of the Dominion Experimental Station, at Lethbridge, Alberta. The nine cows in the herd produced an average of 11,416 pounds of milk and a butterfat average of 396.76 pounds. With butterfat at 41.34 cents per pound this represents a value of \$164.02. Added to this is the value of skim-milk at 25 cents per cwt., at \$27.61 for a total product value per cow of \$191.63. The total cost of feeding was \$102.52, leaving a profit of \$89.11 per head.

Not To His Taste

The lengthy recital had drawn to a close, ice cream and cake had been served, and the teacher was bidding the students goodbye. One of the little performers had brought her small brother with her. As he was about to leave, the teacher, bemusingly asked: "Well, Bobby, did you enjoy the recital?"

"Yes," answered Bobby, "all but the music."

Will Remain At Post

Colonel Hanford Macnider, United States minister to Canada, has dismissed Washington reports to the effect that he might shortly leave his post at Ottawa and embark on political activities in the Republican party.

The Suicide Club.—Nagels Lustige Welt, Berlin.

ACID after meals

GET RID of your dread of pain after eating. Eat without fear of "indigestion," sour stomach, disagreeable gas or headaches.

When your food ferments, "dis-agrees," lies like a lump in your stomach, it's a sign of too much acid. You need not resort to crude methods—take instead an anti-acid that will correct the condition. Phillips' Milk of Magnesia.

A spoonful of this pleasant-tasting, soothing fluid neutralizes many times its volume in acid. It restores the proper alkaline balance to an acid-

soaked stomach and bowels—assists these organs to function as they should.

Phillips' Milk of Magnesia is what you need when a bad breath, coated tongue, headaches, nausea or biliousness indicates an over-acid condition. Take a spoonful today and for several days and see how it sweetens the system. You won't be nearly so liable to colds or sickness. All drugstores in the Dominion sell it in 50c bottles.

Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the name Phillips on the bottle.

CHAPTER IX.—Continued.

"Always, Nick, or I wouldn't have gone with you, of course, I remember just how I felt. I watched you start, and the tears were so near that to stop them I stooped down and began fussing with those jingalls. And then—you came! Oh, I was so afraid you'd see! I had the strangest emotions. I was happy and frightened all in a breath—terribly happy because you'd come, even to say good-bye; and frightened because I feared my heart was in my eyes. I was almost relieved when at last you turned away, though if you hadn't looked back—if you hadn't come back, Nick, I think I should have died."

"Why, my dear, precious little girl? Nick's voice was husky, 'I never guessed. Aren't—aren't women the very limit? Think of your springing that on me after four whole years! And I was too much of a dunce to even know that you were the one girl in the world—for me. Well, you'll have to admit that it didn't take me long to find it out!'"

She looked up at him almost shyly. "Nick—do you still feel that way about me?"

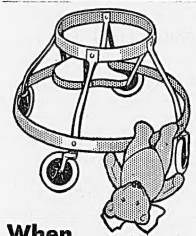

He laughed, and kissed her. "I wouldn't change a hair of your head, my dear."

"Really, Nick?"

Her voice sounded so sober that he said: "Why should you ask? Haven't I been a model husband? Come, Gay, let's not get serious. Let's forget every trouble we ever had, and be kids again. If we start now we can have a half hour at The Bird's Nest, and get back in time to kiss the boys good-night."

It was two weeks after this, one Friday evening when Gay and Simeon were sitting together on the porch, that they were interrupted by a call to the telephone.

"It's a long distance for Mrs. Hal-

When BABIES are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergency. Let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All drugstores have Castoria.

ings," announced the housekeeper, who had answered the ring.

Instantly Gay's heart pounded. Suppose something had happened to Nick! But it was Nick's own voice that reassured her a moment later.

"That you, Gay? How's everything?"

"All right. You frightened me, Nick. What's happened?"

His laugh came back over the wire, sounding so dearly familiar that he seemed very near.

"Nothing—that is—Gay, would you think it terrible if I didn't come to see this week?"

"Why?"

Her voice was hollow. Perhaps Nick noticed for he said: Don't sound so mournful! Of course I want to come; but Mrs. Halliday has asked a favor, and I hate to refuse. Her husband's been called away by the death of his mother, and she's expecting friends for Sunday. She's planned to take them to Mason's Falls. They've got a new car, you know, and for some reason, she doesn't want to drive it, so she asked me to go."

"I see," said Gay.

There followed the least little silence, then she said: "What do you think, dear? I don't exactly like to refuse. I was there to dinner tonight, and she's waiting now to hear your verdict."

"You know best, Nick. We'll miss you, of course; but if you feel you must—"

"Well, I sort of do feel that way; and next week you'll be coming home. Look here! you understand, Gay, don't you?"

Anxiety was in his voice, and she replied: "Yes I understand. Good-night, Nick. Our time must be more than up."

"You could on a minute! You're really all right, aren't you? Not sick or anything?"

"Of course."

"And the boys?"

"Oh, they're splendid; but they'll be disappointed not to see their dad."

"You can tell 'em he's disappointed too. Gee! It's good to hear your voice! I'm getting a little tired of subsisting on letters and week-end visits. Good-night, dear."

"Good-night," said Gay quietly, and hung up.

But she didn't move for a minute. She sat there by the telephone, her heart pounding too rapidly. "Why on earth should I mind so much?" she asked herself. "It's ridiculous—childish. It's not right to get dependent on one human being for all your happiness, even if he's your husband. If I let that feeling grow on me I'll become a jailer. Of course Nick couldn't refuse to go with Mrs. Halliday. This is the third time he's dined there; we'll go home on Wednesday anyway. I ought to be ashamed to mind at all!"

She drew a deep breath and went back to the piazza. It was dark, and Simeon couldn't see her face.

"What's up?" he questioned.

"Nothing, except that Nick can't come tomorrow."

She tried to speak cheerfully, but her mood was not lost on the old man.

"Ain't sick, is he?" he questioned.

"No; but our new neighbor has asked a favor he couldn't very well refuse. She has some visitors, and wants him to drive them to Mason's Falls on Sunday."

"Can't that cynical husband of hers drive a car?"

"She usually drives herself, but she wants a chauffeur for this special trip. Her husband's mother has just died and he's away."

"M—m—" growled Simeon. "So while he attends the funeral, she goes gallivanting with her fine friends? Somehow, Gay, I don't nowadays take to that neighbor of yours."

A breath of relief escaped Gay's lips.

"It does me good to hear you say so, Uncle Sim. I don't take to her,

either; yet I can't lay a finger on anything really wrong with her, except her silly talk about children spoiling her career. I don't see that she has much of a career anyway, though she does sing divinely, and paints, too. Nick says I'm unjust to her. Perhaps I am. I'll admit that to see her ordering a man to weed those flower beds she makes such a fuss about, sometimes enrages me. She looks so neat. Nick spoke of it one day, and I just know he was wishing I looked the same, though he didn't say so."

"Good land! dearie, I wouldn't call you no 'Slovenly Peter.'"

"Well," Gay answered, with a rueful laugh, "I feel like one when I look at Mrs. Halliday! It's hard to keep up with everything when you have two babies as young as mine. I know some of my clothes are behind the times; but they're not worth sending to a dressmaker, and I'm too tired to sew myself. But—but I hate to have my husband think me—historic!"

"Shucks!" said the old man gently, "He don't think no such thing."

"He wouldn't have thought so if it hadn't been for Mrs. Halliday," said Gay. "She's not a product of Bakersville, and she's different from the few summer people who come to us. I just can't understand the Hallidays choosing such a place. They don't like—never will, I am sure. I suppose they'll just upset us a bit and go away—when she tires of her garden."

"The sooner, the better," growled Simeon below his breath; then added cheerfully: "Now, dearie, don't you go gettin' worried about yer looks! I bet if you was to ask Nick outright he'd say you'd got Mrs. Halliday beat to a frazzle."

He rocked quietly for a while. Sure for the frogs down by the mill pond, the night was quiet, until, suddenly, a whip-poor-will raised its voice.

"First I've heard this year," said Simeon quietly; then, "Dearie, if I was to make you a little present—say a hundred dollars I got clutterin' up my desk, couldn't you buy some of them airy nothin's like Mrs. Halliday's, without the bother of goin' to a dressmaker? Seems like I seen catalogues o' most everything under heaven, from this new-fangled underwear they call undies, to party dresses that ain't got no back! Not that I'm advisin' you to dress that-a-way; but you can't be young only once, Gay, and I wouldn't want to think you was goin' without things you hanker for—not while I don't know what to do with my spare cash."

For a minute Gay did not speak, then she arose impulsively, and seating herself upon the old man's knee, kissed his cheek.

"Uncle Sim—you're the most understanding person in the world. My first thought, after gratitude to you, was that I mustn't take a gift like that from anybody; but 'Tve changed my mind because I know it will make you happy to give happiness to me. I don't say I'll spend it all on clothes; but I'll freshen up a bit, and get some things the children need."

(To Be Continued.)

History Lecturer—"Can any of you tell me what makes the Tower of Pisa lean?"

Curplent Lady: "I don't know, or I'd take some myself."

Italy expects a downward revision of agricultural wage scales.

Weak After Operation

"I was very weak after an operation. My nerves were so bad I would sit down and cry and my husband would not go out and leave me alone. Now my nerves are much better thanks to a booklet that was left under the door. Lydia E. Pinkham's Vegetable Compound surely put me on my feet. I have taken eight bottles. My friends tell me I look fine. My sister has taken this medicine too."—Mrs. Annie Walton, 67 Stanley St., Kingston, Ontario.

Lydia E. Pinkham's Vegetable Compound

Lydia E. Pinkham Med. Co., Lynn, Mass., U. S. A. and Canada, Ontario, Canada.

Linking Up "Canada's Main Street"

By William Childie, Executive Secretary, Eastern Manitoba Development Bureau and General Secretary Manitoba Trans-Canada Highway Association.

Great hopes will be realized when Manitoba and Ontario are officially linked up with the National Highway in the fall of this year. Much energy and hard work has been gone through by the Manitoba Motor League, Municipalities, Service Clubs, Good Roads Organizations and prominent men of both Western Ontario and Eastern Manitoba, since the year 1919, when first our people went on record as demanding a highway out from the head of the Great Lakes and the City of Winnipeg.

The day of the official opening of the highway between Kenora and Winnipeg has not yet been set, but it may safely be said that it will be in the early part of next September, probably Labor Day, in order to give the motor tourist and owner a chance to come down to the Ontario border and take in the celebrations.

The Eastern Manitoba Development Bureau, sponsors of the movement, for an official ceremony and picnic, have also called upon the Manitoba Motor League through its live wire Secretary A. C. Emmett, to assist in laying out plans for the monster event.

W. J. Graves, vice-president of the Manitoba Motor League, has also thrown in his lot with the movement. M. Seipp, and J. T. Rebert, representing the St. Boniface Kiwanis, and St. Boniface Board of Trade, willingly allowed their names to go on the roster as members of the Public Relations Committee.

Messrs W. J. Graves, president, Manitoba Motor League, and A. C. Emmett, the secretary, are authorized to proceed to Western Ontario points to interview the heads of different organizations who it is anticipated will be extending their support in this epoch making event to be celebrated next September.

Assurances have been received from both the Ontario and Manitoba Governments that the road will be open for this event and that they will give their hearty co-operation to the movement.

Persian Balm is the one true family aid for skin health and beauty. Aids the mother in additional loveliness. Protects the tender skin of the world. Delicately the finest as a hair fixative or cooling shaving lotion. No matter to what use it is put, it is always beneficial to the skin. Every woman should use it. Persian Balm cools and caresses the skin and creates complexion of surpassing loveliness.

Hiking Around World

Jugo-Slavian Youth Started From Washington Last September

Arriving at Halifax in the course of a projected journey around the world, mostly by foot, that began at Washington in September, Joseph Sekulick, slim young Jugo-Slavian, left to get a ship for Newfoundland, whence he plans to sail for England. At an average rate of 30 miles a day, Sekulick had hiked 2,511 miles when he reached Halifax. He hopes to complete the globe-circling tour at Washington in something less than four years. The total mileage of his planned trip is 33,100. With a command of eight languages, Sekulick anticipates less difficulty in European and other countries than would, otherwise be the case.

Its Main Use

At a meeting of a rural district council a deputation of farmers asked to be received. They wished to complain about the state of a main road just outside the village. They found, however, that their arguments were not received very favorably. At last the chairman managed to get a word in.

"Look here," he said, "the road is fairly good as a whole."

"Yes," replied the spokesman of the party, "but we want to use it as a road."

Packed Into Small Space

Until 1892, the largest telephone cable contained only 50 pairs of wires; whereas a cable has now been perfected which contains 3,636 wires, packed within a diameter of only two and five-eighths inches.

W. N. U. 1873

Sight-Sound Dramatic Production Broadcast

Actors In Studio At Chicago Make Television History

Side-stepping almsister looking equipment, a small audience squeezed in between humming machinery in the control room of station WOXAP, and watched from behind the scenes what is believed to have been the world premier broadcast of a synchronized sight-sound dramatic production.

Irene Wickner, Vinton Haworth and Douglas Hope, made television history in their appearance in "The Maker of Dreams."

The play went on the air to be received by those with a television and radio combination set, the effect being a close relative to a small talk, but not without many flaws as yet. But the experts said "Give science time."

Everything possible was done to outlast noise because the creak of shoe-leather would have given the impression of artillery in action; the men played in stockinged feet. The girls wore soft sandals.

A Simple Treatment For Children's Colds

Cold in the head is very common at this time of year, especially in the very young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system is the first step in treating a cold, whether in infants or adults. For the very young, Baby's Own Tablets are the ideal means of doing this. Containing no narcotic or other harmful drugs they soothe the child's fretfulness, relieve its suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea; break up colds and simple fever; promote health-giving sleep and make the dreaded teething period easy. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Thought Converted Into Electric Energy

Invention Of German Professor Something Entirely New

A machine which is said to register thought by curves has been invented by Professor Hans Berger, of the University of Jena, Germany. The invention converts thought into electric energy, which is registered on a chart. The "thought chart" looks like a weather or earthquake chart. Deep thinking shows violent up and down, shallow thinking merely a zig-zag line. So far, nobody has been able to read the thoughts themselves, and further research will be made to discover whether an interpretation of the curve is possible.

British picture shows are visited by something like 30,000,000 people every week.

The pleasure mad are probably mad because they find no pleasure.

LOSE YOUR FAT This sensible way

Start taking Kruschen Salts—that's the common-sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape and fill you with a vigor and lifeless energy you'd almost forgotten had existed—until you get the needed exercise.

As a result instead of planting yourself in an easy chair every free moment and letting flabby fat accumulate you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

Kruschen Salts are the up-to-date Fountain of Youth. Take one-half teaspoon in a glass of hot water to-morrow morning and every morning be careful of the foods you eat—take regular moderate exercise—then watch the pounds slide off.

Little Helps For This Week

"Thou wilt show me the path of life; in Thy presence is fulness of joy."—Psalm xvi. 11.

I need Thy presence every passing hour: What but Thy grace can foil the tempter's power? Who like Thyself my guide and stay can be?

Through cloud and sunshine, oh, abide with me.

You remember the old story of how Michael Angelo wore over on his forehead, fastened in his artist's cap, a lighted candle, which always shows brightly on his work, and kept his shadow from falling on it. If it could always have thus the light of Christ's self presence ever falling onward on my path, keeping the shadow of self behind and out of sight, ah, what an easy climb it would be then!—In the Mists.

Relief Of "Lustiana"

A bottle covered with mussels and seaweed, containing a paper on which was written in English, "Lustiana torpedoes; will sink within ten minutes," was washed up on the shore of Langeness Island, off North Frisia-land, it was learned here recently. Those who examined the bottle are convinced of its genuineness. It has been forwarded to the Cunard Line office in London, England.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. The fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Valuable Manuscript

A valuable Syriac manuscript in the University of Chicago weighs 50 pounds and its parchment pages are expected to reveal new light on Christianity in the Dark Ages, for it deals with "A Collection of Selected Discourses On All the Feasts Composed by Orthodox Holy Fathers."

The Chinook Advance

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada. The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line. Legal advertising, 15c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

Heard Around Town

W. Vanderberg was a Youngstown visitor for the week.

Carl Grupp, of Dobson, is visiting with his aunt, Mrs. Vanderberg.

A new furnace has been installed in the Laughlin school. Now watch out for warm weather.

Mrs. Geo. Connell and son Gordon, north of town, visited at the home of Mr. and Mrs. Milligan over the week end.

Mrs. Walter Anderson entertained Mr. and Mrs. N. D. Stewart and Mr. and Mrs. O. D. Harrington to dinner Tuesday afternoon.

The little son of Mr. and Mrs. Jos. Massey has been very ill this week with pneumonia. There is a slight improvement today.

Thos. Sandman left Tuesday for British Columbia. If he finds a suitable location it is his intention to move his family there.

The C.G.I.T. held their meeting in the station house on Wednesday. The business part of the meeting was carried on, after which an interesting hour at sewing was spent.

The Ladies' Card Club met this week at the home of Mrs. S. H. Smith. Mrs. Murray held the high score of the evening. Next week Mrs. C. Peterson will be the hostess.

Double Hockey Game, Saturday, Jan. 24th, at 2 p.m. Youngstown Greys vs. Chinook Tigers, also Cereal Sport Merchants vs. Chinook R. A. 6.

A whist party was held at the home of Mr. and Mrs. Wm. Vanderberg on Monday. Mrs. Vanderberg held highest score for ladies, and Mr. Butler for men. Ladies prize was a salad bowl, gent's prize a shaving set. An enjoyable evening was spent by all.

J. C. Cottrell, of Cereal, entertained a number of his Cereal friends, also Mr. and Mrs. Wright Lawrence, to a dinner and bridge party at the Cereal Hotel on Tuesday evening. Mrs. Lawrence was the winner of the lady's prize and Mr. Agar the gent's prize at bridge.

The three act play, entitled "The Poor Married Man," which was put on by the company from Flaxland district in the school hall, Chinook, last Friday, was a great success in every respect. The attendance was good, both at the play and dance. We must congratulate those who took part, as the acting was good.

Collholme Collections

With much regret we must announce the death of one of the oldest settlers of this district, Mrs. Finley Robertson, who passed away on Jan. 11. Mr. and Mrs. Robertson settled in this district as one of the few back in 1910-11. Since that time many changes have taken place, among which they were involved. The Robertson's moved to the district of Oakville, Man., where Mrs. Robertson passed away after a short illness. On behalf of this community we wish to extend to Mr. Robertson and family our most sincere sympathy at this time of bereavement.

The U. F. A. and Wheat Pool Locals of this district held their meeting at the Collholme school Saturday last. A good attendance is reported and much business transacted.

In the U. F. A. meeting, E. B. Allen and N. D. Morrison were chosen as delegates to attend the convention in Calgary.

The Wheat Pool Local held their annual meeting, in which the retiring president, J. Ferguson, was replaced by W. W. Wilson, after a lengthy discussion, in which three presidents were elected and then dismissed.

During the meeting the secretaries of each local were instructed in behalf of the people, to send a letter of condolence to Mr. F. Robertson in his recent bereavement. The meeting was then adjourned to re-meet at the Cloverleaf school on Jan. 31st at 2 p.m.

Following the U. F. A. meeting at Cloverleaf on Jan. 31st, there

will be a meeting of the Collholme Horse Breeders' Association. E. J. Ellis, sec.-treas., requests all to attend.

N. D. Morrison and E. B. Allen left Tuesday morning for Calgary, where they will attend the annual U. F. A. convention.

Miss Pearl Stevenson was visiting for a few days last week at the Morrison home.

The service conducted by the W. M. S. of this district last Sunday attracted a good crowd and many good items were presented. Rev. F. McDowell, pastor, gave the discourse and Mrs. Parks, Youngstown, gave an address on behalf of the W. C. T. U.

Ed. Daves has recently constructed a windmill to charge his

radio battery. These windmills are becoming a familiar sight throughout the district, as six or seven are already in use. This provides cheap and dependable power for charging batteries, especially when \$1.50 is required to charge batteries in most towns, and unless this price is cut many more windmills will be constructed and many more batteries charged at home.

Barber Shop Prices

Owing to conditions throughout the district the Chinook Barber Shop offers a reduced price list, as follows:

Haircutting—Men	35c
Girls and boys, under 14	25c
Ladies	35c
Trim	25c
Shampoo	35c
Shave	20c
Tonic Hairdressing	10c
Razor Honed	25c
Sharpened on our Rotex Machine	25c
Neck clip	10c
Massage	50c
Neck Shave	5c
Scissors	25c

Mr. and Mrs. H. Smith, of Clemons, also Miss Evelyn Priest, spent Sunday evening at the home of N. D. McKinnon.

Mr. and Mrs. J. Ferguson and son Ben, spent Sunday evening at the home of N. D. Stewart.

FOR SALE—Coleman Radiant Heater, almost new, at a sacrifice. Apply Chinook Advance.

Shareholders Meeting

On Saturday, Jan. 31, at 2 p.m., the shareholders of the U.G.G. will hold a meeting in the Chinook school to hear the report of their delegate, W. S. Sellers, who attended the annual convention of the U.G.G.

Immediately following the above the Chinook Local of the Pool will hold an organization meeting. N. D. Stewart will be present to give further information on matters pertaining to the Pool. All U.G.G. also Pool members are requested to attend and make the meeting as interesting as possible.

Church Announcements

CHINOOK UNITED.
Sunday School every Sunday 2 p.m.
Sunday, Jan. 25th, service at 7:30 p.m.
Come and enjoy the services with us.
Pastor, J. D. Woolhat, B.A.

Bible study will be held at the A. V. Bradine home on Friday evening, Jan. 23, at 8 o'clock.

CHINOOK CATHOLIC
Service Second Sunday Every Month.
Mass at 8 a.m.

Small Advertisements

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two.

Less deposited in bank between Dec. 31, 1930, and date of audit 170 51

I have audited the accounts of the Village of Chinook for the year ending 31st December, 1930, and have compared the said accounts with their relative vouchers and certify that in my opinion the foregoing financial statements are properly drawn up so as to exhibit a true and correct view of the financial affairs of the Village, according to the best of my information, the explanations given to me, and as shown by the records; subject to any qualifications mentioned under General Remarks by auditor.

The statistical information contained herein was obtained from the books and records of the Village, or from information supplied by officials of the Village.

Dated at Chinook this 14th day of January, 1931.
S. E. NELSON, Auditor,
Chinook, Alta.
